

One-Leg Out Instant Credit Transfer (OCT Inst) Scheme

Inter-PSP OUTGOING Implementation Guidelines

EPC294-22 / 2023 Version 1.0 / Date issued: 30 June 2023 / Date effective: 28 November 2023 /

Effective Time: 08:00:00.000 CET

Public

Abstract

This document sets out the rules for implementing version 1.1 of the 2023 One-Leg Out Instant Credit Transfer Scheme Rulebook, based on the 2019 message version of the ISO 20022 standard.

The focus is on the **OUTGOING** (i.e., from the Euro Leg into the non-Euro Leg) OCT Inst and related R-transactions.

0.2 Change History

Issue number	Dated	Reason for revision
2023 V1.0	20230630	First version of the OCT Inst Inter-PSP OUTGOING Implementation Guidelines. Approval by the May 2023 Board.

0.3 Purpose of Document

The objective of these Guidelines is to define the rules to be applied to the inter-Payment Service Provider (PSP) ISO 20022 XML message standards for the implementation of the Euro One-Leg Out Instant Credit Transfers (OCT Inst) as defined in the One-Leg Out Instant Credit Transfer Scheme Rulebook.

The focus in this document is on the OUTGOING (from Euro Leg into the non-Euro Leg) OCT Inst Credit transfers and related R-transactions. The INCOMING flow is covered in document EPC251-22.

¹ See also http://www.swift.com/products/bic_registration/iban_format_registration

Note: The term 'Customer' is to be understood as 'Payment Service User' (PSU), meaning a natural or legal person making use of a payment service in the capacity of Payer, Payee, or both.

1 Introduction

This document sets out the Euro One Leg Out (EOLO) rules for implementing the inter-PSP credit transfer ISO 20022 XML message standards. The OCT Instant Credit Transfer Scheme Rulebook defines datasets which are implemented in the relevant ISO 20022 XML message standard as follows:

OCT Inst Scheme Rulebook	ISO 20022 XML Message Standards
DS-02 <i>Inter-PSP OCT Inst Payment Dataset</i>	FI to FI Customer Credit Transfer (pacs.008.001.08)
DS-03 <i>OCT Inst Confirmation Dataset</i>	Positive confirmation (ACCP) – FI to FI Payment Status Report (pacs.002.001.10) Negative confirmation (RJCT) – FI to FI Payment Status Report (pacs.002.001.10)
DS-04 <i>OCT Inst Return Dataset</i>	Payment Return (pacs.004.001.09)
DS-06 <i>OCT Inst Recall Dataset</i>	FI to FI Payment Cancellation Request (camt.056.001.08)
DS-07 <i>Response to OCT Inst Recall Dataset</i>	Positive Response: Payment Return (pacs.004.001.09) Negative Response: Resolution of Investigation (camt.029.001.09)
<i>Request for Status Update on a Request for Recall Dataset (see section 4.3.4.3)</i>	FI To FI Payment Status Request (pacs.028.001.03)
DS-08 <i>OCT Inst Inquiry Dataset</i>	Claim Non Receipt (camt.027.001.07)
DS-09 <i>Response-to-OCT Inst Inquiry Dataset</i>	Positive/Negative Response: Resolution of Investigation (camt.029.001.09)
DS-10 <i>OCT Inst Transaction Status Investigation Dataset</i>	FI To FI Payment Status Request (pacs.028.001.03)
DS-11 <i>Inter-PSP OCT Inst Inquiry Fee Payment Dataset</i>	FI to FI Customer Credit Transfer (pacs.008.001.08)
<i>Request for Status Update on an OCT Inst Inquiry (step ii under 4.4.1)</i>	FI To FI Payment Status Request (pacs.028.001.03)

The Guidelines for the EOLO inter-PSP message standards are mandatory.

1.1 Coverage of the EOLO Implementation Guidelines

The purpose of the EOLO Implementation Guidelines, hereafter referred to as the Guidelines, is to provide guidance on the use of the Global ISO 20022 XML standards in making EOLO core payments as defined in the OCT Inst scheme rulebook and supplemented by processing requirements.

The Guidelines are fully aligned to the EOLO core requirements as defined in the Rulebook and identify message elements needed for inter-PSP processing while recognising message elements that may be available for use in Additional Optional Services (AOS), as shown below.

Global ISO 20022 XML Message Standards			
Message elements from the ISO messages corresponding to Rulebook requirements	Message elements that are mandatory in the ISO messages or needed for Inter-PSP Processing	Message elements from the ISO messages available for use by AOS within an EPC Governance framework	Message elements from ISO messages not applicable to EOLO
EPC Implementation Guidelines for the EOLO Core Mandatory subset, identifying elements <ul style="list-style-type: none"> - to be used as defined in ISO - to be used with EOLO usage rules (from or completing the Rulebook) Note: yellow fields can be used in a specific way for an AOS.		To be developed and documented by AOS Communities	Not available for use in EOLO payments
EOLO Payments			

Figure 1

These Guidelines define the EOLO Core Mandatory Subset² of the Global ISO 20022 XML standard that consists of message elements:

- required in the Rulebook as business requirements.
- Needed for processing by PSPs and clearing and settlement mechanisms.

These message elements define the **EOLO core service** and are denoted by yellow shading in the message structures given in the following chapters. Only these elements are further detailed with relevant EOLO core requirements, such as the use of the message element, its components or the values that must be used. Usage rules, for example, may indicate limits on the number of repetitions, or code value restrictions, while format rules may be used to indicate the allowable combinations of components of a message element.

These Guidelines also recognise message elements and the usage rules in the ISO 20022 XML standard that may be available for use in an AOS, subject to a

² The EOLO Core Mandatory Subset is hereafter known as the EOLO core service.

governance framework to be defined by the EPC. The definition and documentation of these message elements are a matter for the AOS communities involved. These message elements are denoted by white shading.

Where there are message elements that do not apply to EOLO payments, these are denoted with red shading in the right-most column of the message structures. To date, few such message elements have been identified.

1.2 Use of these Guidelines by the instructing and instructed parties³

- EOLO core payments are executed using messages only containing message elements defined as part of the EOLO Core Mandatory Subset (shaded yellow in Figure 2).
- Payments that include message elements that are defined and documented by AOS communities (shaded white/yellow in Figure 2) are considered as EOLO payments, but not as EOLO core payments.
- It is the responsibility of the Euro Leg-Based instructing PSP of the message to ensure that message elements defined for use in an AOS are only included in messages sent to AOS community members.
- The Euro Leg-Based instructed PSP receiving a message containing AOS-related message elements, but which is not a member of the AOS community, may ignore the information, that is, not use it for processing, nor forward it to the next party in the chain. The instructed PSP, however, may reject the message for this reason.

1.3 Notation Conventions

The Guidelines are presented in a similar format than the one used in the ISO 20022 XML standard.

#	EOLO Mul	Message Element	EOLO Core Requirements
1.00	1..1	Message root +Group Header ++Sublevel 1 +++Sublevel 2	<i>EOLO Usage Rule(s)</i> (e.g. Mandatory) <i>EOLO Format Rule(s)</i> ISO Name ISO Definition XML Tag Type (Yellow: Message Element that is part of the EOLO Core Service)
	1..1		XML Tag xs:choice
1.01	1..1	Message root +Group Header ++Sublevel 1 +++Sublevel 2 ++++Sublevel 3	<i>EOLO Rulebook</i> (Attribute used in Rulebook) <i>EOLO Usage Rule(s)</i> (e.g. Only 'INST' is allowed.) ISO Name ISO Definition XML Tag Type ISO Length <i>EOLO Length</i> (Yellow: Message Element that is part of the EOLO Core Service)
			EOLO Code restrictions
			<i>INST</i>

³ Instructing and instructed parties include CSMs and OCT Inst processors.

1.02	1..1	Message root +Group Header ++Sublevel 1 +++Sublevel 2 ++++Sublevel 3	<i>ISO Name</i> <i>ISO Definition</i> <i>XML Tag</i> <i>Type</i> (White: Message Element that is not part of the Core Service but is available for use in an EOLO AOS)
1.0n	0..1	Message root +Group Header ++Sublevel 1	<i>ISO Name</i> <i>ISO Definition</i> <i>XML Tag</i> <i>Type</i> (Red: Message Element that is not to be used in EOLO Payments)

Figure 2

Where:

- Column 1 indicates the message element Index number specific to these Implementation Guidelines..

Components of message elements that are not allowed in EOLO payments or where no EOLO requirements are defined are not displayed in full as the ISO 20022 XML standard applies.

- Column 2 indicates the mandatory or optional status and the number of repetitions defined by the EOLO Core Requirements, e.g.:
 - 0..1 element is optional and may only be present once
 - 0..n element is optional with unlimited repetition
 - 1..1 element is mandatory and must be present exactly once
 - 1..n element is mandatory with unlimited repetition

The displayed EOLO multiplicity may thus differ from the one of the ISO 20022 XML standard. When an element is shaded yellow, possible remaining ISO 20022 occurrences are available for use in an AOS.

Empty elements are not allowed (i.e. a message shall not contain elements without content).

- Column 3 indicates the full path of an element where the last line contains the name of the message element as defined in the ISO 20022 XML standard. When an element contains sub-elements these are indented to the right and noted with a plus sign (+) per level.
- Column 4 specifies in italic characters the EOLO Core Requirements as additional rules to those specified in the ISO 20022 XML standard, which are shown in non-italic characters.
 - When defined in the Rulebook, the attribute is indicated by the attribute name and where applicable, the number, i.e., AT-*nn*. Those message elements are shaded yellow.
 - When the message element relates to inter-PSP processing requirements, it is shaded yellow.
 - When the message element specified in the ISO 20022 XML standard is used for EOLO payments without change (regarding the definition and any usage rules), no specific EOLO Core requirements are provided and is shaded yellow.
 - When the message element is specified in the ISO 20022 XML standard as optional, but is mandatory in EOLO Core requirements, this is specified as 'Mandatory' and is shaded yellow.

- When the message element is not available for use in EOLO payments, this is indicated with red shading. Note that these message elements are similarly not available for use in an AOS.
- The EOLO length is indicated for every message element (if applicable), even if it is the same length as in the ISO 20022 XML standard.

Column 4 may also indicate conditional relations between message components or elements, e.g. either component 1 or component 2 must be present, component 1 and component 2 are mutually exclusive. For XML Tag "xs:choice" (containing just one subsequent component or element due to applied restrictions on subsequent components or elements) column 4 may indicate, that the "choice" nature is lost due to applied restrictions i.e. only one element is shaded yellow.

1.4 Character Set

The character set issue centres on the use of the full set characters in the message elements. Two considerations are:

- While PSPs must be allowed to use the character set currently in use at national level,
- PSPs cannot be required to support in the Euro Leg of the OCT Inst Transaction the full character set used in all the countries.

Therefore:

- The ISO 20022 XML messages allow for the full range of global language requirements (UTF-8).
- PSPs must be able to support the Latin character set commonly used in international communication, as follows:
a b c d e f g h i j k l m n o p q r s t u v w x y z
A B C D E F G H I J K L M N O P Q R S T U V W X Y Z
0 1 2 3 4 5 6 7 8 9
/ - ? : () . , ' +
Space
- Special characters ! # \$ % & * = ^ ` { | } ~ " ; < > @ [\] are allowed in:
 - All party (agents and non agents) Name and Address elements.
 - The Related Remittance Information element
 - The Remittance Information (structured & unstructured) element
 - The Email Address where included as part of Proxy elements
 - City of Birth and Province of Birth elements nested in Private Identification
- References, identifications and identifiers must respect the following [8]:
 - Content is restricted to the Latin character set as defined above (including the above mentioned special characters if applicable)
 - Content must not start or end with a '/'
 - Content must not contain '//'

Note: When a slash is used as delimiter between the attribute number (AT-XXXX) or code (ABCD) and the data content, no space is allowed directly after this slash.

However, there may be bilateral or multilateral agreements to support one or more sets of characters beyond the Latin character set referred to above.

1.5 General Message Element Specifications

1.5.1 BIC

If a BIC is used to identify financial institutions (Agents in the ISO 20022 XML standards) either BIC 11 or BIC 8 may be used.

1.6 Implementation of ISO 20022 XML rules

This document should be read in conjunction with the ISO 20022 XML message standards.

2 Mandatory Euro-Leg PSP-to-PSP Messages

2.1 Inter-PSP OCT Inst Dataset (DS-02)

2.1.1 Use of FI to FI Customer Credit Transfer (pacs.008.001.08)

The message is used to transport the OCT Inst payment instruction from the Euro Leg-Based Payer's PSP to the Euro Leg Exit PSP, directly or through intermediaries.

The message caters for a single payment instruction.

Note: The use of OCT Inst is implied by element 'Service Level' being mandatory and 'Code' set to "EOLO" (Euro One Leg Out) and 'Local Instrument' being mandatory and 'Code' set to "INST" (Instant Credit Transfer) only.

2.2 Positive OCT Inst Confirmation Message Dataset (DS-03)

2.2.1 Use of the FI to FI Payment Status Report (pacs.002.001.10)

When the code "ACCP" (Accepted Customer Profile) is used in the 'Group Status', the message transports the positive confirmation between PSPs, directly or through intermediaries.

The message caters for a single positive confirmation instruction only.

Note: The use case of the message is implied by the Name', 'pacs.002.001.10', the 'Original Message Name Identification' set to 'pacs.008', 'Group Status' set to "ACCP" and 'Payment Type Information' mentioning "INST" (Transaction is related to an Instant Credit Transfer) under 'Local Instrument/Code'.

Note: Message elements under 'Original Transaction Reference' sequence are based on DS-02 attributes.

2.3 Negative OCT INST Confirmation Message Dataset (DS-03)

2.3.1 Use of the FI to FI Payment Status Report (pacs.002.001.10)

When the code "RJCT" (Rejected) is used in the 'Group Status' or 'Transaction Status', the message transports the negative confirmation between PSPs, directly or through intermediaries.

Reason code "TM01" (Invalid Cut-off Time) is the only reason code that can be used in a negative confirmation message sent by the CSM to the Euro Leg Exit PSP. Reason code "TM01" is not allowed in a negative confirmation message to the Euro Leg-Based Payer's PSP. Instead the code "AB05" (Time-out Creditor Agent) or "AB06" (Time-out Instructed Agent) can be used by the CSM to be sent to the Euro Leg-Based Payer's PSP.

The message caters for a single negative confirmation instruction.

Note: Attribute AT-R001 'The type of R-message' is implied by the 'Message Name', 'pacs.002.001.10', the 'Original Message Name Identification' set to 'pacs.008', 'Group Status' or 'Transaction Status' set to "RJCT" and 'Payment Type Information' mentioning "INST" (Transaction is related to an Instant Credit Transfer) under 'Local Instrument/Code'.

Note: Message elements under 'Original Transaction Reference' sequence are based on DS-02 attributes."

2.3.2 Message Element Specifications

The reasons for a negative confirmation of the OCT Inst present in the Rulebook are mapped to ISO codes as follows (applies only to 'Transaction Information And Status'):

ISO Code	ISO Name	EOLO Core Reason as specified in the Rulebook
AB05	Timeout Creditor Agent	Transaction stopped due to timeout at the Creditor Agent.
AB06	Timeout Instructed Agent	Transaction stopped due to timeout at the Instructed Agent.
AB07	Offline Agent	Agent of message is not online. Generic usage if it cannot be determined who exactly is not online.
AB08	Offline Creditor Agent	Creditor Agent is not online.
AB09	Error Creditor Agent	Transaction stopped due to error at the Creditor Agent.
AB10	Error Instructed Agent	Transaction stopped due to error at the Instructed Agent.
AC01	Incorrect Account Number	Unique identifier of the Payee's account incorrect (i.e. invalid IBAN)
AG02	Invalid Bank Operation Code	Operation/transaction code incorrect, invalid file format <i>Usage Rule:</i> To be used for incorrect 'operation/transaction' code.
AG03	Transaction Not Supported	The non-Euro Leg Payee's FI does not accept transaction.
AG09	Payment Not Received	Original payment never received.
AG10	Agent Suspended	Agent of message is suspended from the Real Time Payment system. Generic usage if it cannot be determined who exactly is suspended.
AG11	Creditor Agent Suspended	Creditor Agent of message is suspended from the Real Time Payment system.
AM02	Not Allowed Amount	Amount exceeds maximum amount authorized in the Euro Leg.
AM05	Duplication	Duplicate payment.
AM23	Amount Exceeds Settlement Limit	Euro Leg settlement limit exceeded
BE04	Missing Creditor Address	Address of the Payee invalid.
BE07	Missing Debtor Address	Address of the Payer invalid.
CNOR	Creditor bank is not registered	Euro Leg Exit PSP not registered

ISO Code	ISO Name	EOLO Core Reason as specified in the Rulebook
		under this identification code
DNOR	Debtor bank is not registered	Euro Leg-Based Payer's PSP not registered under this identification code
ED05	Settlement Failed	Settlement of the Euro One-Leg Out Credit Transfer failed
MS03	Not Specified Reason Agent Generated	Reason not specified.
RC01	Bank Identifier Incorrect	Identification code of the non-Euro Leg Payee's FI is incorrect (i.e. invalid BIC or other code)
RR01	Missing Debtor Account Or Identification	Regulatory Reason.
RR02	Missing Debtors Name Or Address	Regulatory Reason.
RR03	Missing Creditors Name Or Address	Regulatory Reason.
RR04	Regulatory Reason	Regulatory Reason.

Following code describes the only reason that can be used in a negative confirmation message sent by the CSM to the Euro Leg Exit PSP:

ISO Code	ISO Name	EOLO Core Reason as specified in the Rulebook
TM01	Invalid Cut Off Time	Euro Leg time-out – maximum execution time has been exceeded.

2.4 OCT Inst Return Dataset (DS-04)

2.4.1 Use of the Payment Return (pacs.004.001.09)

The message is used to transport the OCT Inst Return instruction between the Euro Leg Exit PSP and the Euro Leg-Based Payer's PSP, directly or through intermediaries, where the following apply:

- Index 1.22 'Instructing Agent' to be populated with AT-X002 'The Identification Code of the Euro Leg Exit PSP', in case the Euro Leg Exit PSP is a direct CSM participant, if not AT-X002 is to be provided in 'Instructing Reimbursement Agent' (index 1.16).
- Index 3.29 'Return Chain' can only be used if the Euro Leg Exit PSP received this information from the non-Euro leg, in which case it has to be transported unchanged.

The message caters for a single return instruction only.

Note: Attribute AT-R001 'The Type of R-message' is implied by the 'Message Name', 'pacs.004.001.09', the 'Original Message Name Identification' set to 'pacs.008' and 'Payment Type Information' mentioning "INST" (Transaction is related to an Instant Credit Transfer) under 'Local Instrument/Code'.

Note: Message elements under 'Original Transaction Reference' sequence are based on DS-02 attributes. Although the DS-04 Dataset refers to an "exact copy of the original inter-PSP payment dataset (DS-02) which is being returned/rejected", this is not feasible as the pacs.004 message does not contain all the original DS-02 elements under 'Original Transaction Reference'.

2.5 OCT Inst Recall Dataset (DS-06)

2.5.1 Use of FI-to-FI Payment Cancellation Request (camt.056.001.08)

The message is sent by the Euro Leg-Based Payer's PSP (on behalf of the Payer) to the Euro Leg Exit PSP to request the cancellation of an OCT Inst Transaction (pacs.008), where the following apply:

- Index 4.3 'Cancellation Identification' can only be populated with AT-R053 'The Euro Leg-Based Payer's PSP initiating the OCT Inst Recall.
- Index 4.19 'Originator' can only be populated with AT-R002 'Identification of the type of party initiating the R-message'.
- Index 4.20 'Reason' is to be populated with AT-R051 'The OCT Inst Recall reason code', where:
 - Index 4.21 'Code' can only be populated with ISO codes "AC03" (Invalid Creditor Account Number), "AGNT" (Incorrect Agent), "AM09" (Wrong Amount), "CUST" (Requested By Customer), "DUPL" (Duplicate Payment), "FRAD" (Fraudulent Origin) and "TECH" (Technical Problem).
- Index 4.23 'Additional Information' is allowed only when "FRAD" is used as Recall reason code and in such case is to be populated with AT-R052 'Additional Information to AT-R051 The OCT Inst Recall reason code.

The message caters for single or group cancellation requests. Group cancellation requests allow recall of single or multiple transactions from single or multiple original messages.

Note: Attribute AT-R001 'The type of R-message' is implied by the 'Message Name' set to 'camt.056.001.08', the 'Original Message Name Identification' set to 'pacs.008', 'Reason' set as per the above (under 'Code') and 'Payment Type Information' mentioning "INST" (Transaction is related to an Instant Credit Transfer) under 'Local Instrument/Code'.

Note: Message elements under 'Original Transaction Reference' sequence are based on DS-02 attributes. Although the DS-05 Dataset refers to an "exact copy of the original inter-PSP payment dataset (DS-02) which is being recalled", this is not feasible as the camt.056 message does not contain all the original DS-02 elements under 'Original Transaction Reference'.

	1..1	FITo FIPayment Cancellation Request V08	ISO Name ISO Definition	FITo FIPayment Cancellation Request V08 Scope The FIToFIPaymentCancellationRequest message is sent by a case creator/case assigner to a case assignee. This message is used to request the cancellation of an original payment instruction. The FIToFIPaymentCancellationRequest message is exchanged between the instructing agent and the instructed agent to request the cancellation of an interbank payment message previously sent (such as FIToFICustomerCreditTransfer, FIToFICustomerDirectDebit or FinancialInstitutionCreditTransfer). The FIToFIPaymentCancellationRequest message supports both the request for cancellation (the instructed agent - or assignee - has not yet processed and forwarded the payment instruction) as well as the request for refund (payment has been fully processed already by the instructed agent - or assignee).

2.6 Positive Response to OCT Inst Recall Dataset (DS-07)

2.6.1 Use of the Payment Return (pacs.004.001.09)

The positive response to a:

- Recall of an OCT Inst message (FI-to-FI Payment Cancellation Request, camt.056.001.08);
- Request for Status Update on a previously issued OCT Inst Recall request (FI-to-FI Payment Status Request, pacs.028.001.03, refer to section 'Request for Status Update on a Recall of an OCT Inst' below);

is to be made using an inter-PSP return credit transfer message (pacs.004), where the following apply:

- Index 1.9 'Interbank Settlement Date' to be populated with AT-R056 'The Settlement Date for the positive response to the OCT Inst Recall'.
- Index 1.22/3.27 'Instructing Agent' to be populated with AT-X002 'The Identification Code of the Euro Leg Exit PSP', in case the Euro Leg Exit PSP is a direct CSM participant, if not AT-X002 is to be provided in 'Instructing Reimbursement Agent' (index 1.16).
- Index 3.13 'Returned Interbank Settlement Amount' to be populated with AT-R054 'The returned amount of the positive response to the OCT Inst Recall in euro'.
- Index 3.17 'Returned Instructed Amount' may be used.
- Index 3.18 'Exchange Rate' may only be used if the currency of the Returned Amount is different from Euro.
- Index 3.22 'Amount' (under 'Charges Information') to be populated with AT-R055 'The fee for the positive response to the OCT Inst Recall in euro', if any.
- Index 3.24 'Financial Institution Identification' (under 'Agent' under 'Charges Information') to be populated with AT-C002 'The Identification Code of non-Euro Leg Payee's FI'.
- Index 3.29 'Return Chain' can only be used if the Euro Leg Exit PSP received this information from the non-Euro leg, in which case it has to be transported unchanged.
- Index 3.31 'Originator' to be populated with AT-R002 'The Identification of the type of party initiating the "R" message'.
- Index 3.33 'Reason/Code' (under 'Return Reason Information') to be populated only with "FOCR" (Following Cancellation Request).
- Index 3.35 'Additional Information' (under Return Reason Information) to be used with a mandatory occurrence starting with "ATR053/" followed by the information as per attribute description 'The specific reference of the Euro Leg-Based Payer's PSP initiating the OCT Inst Recall'.

The message caters for a single or group positive response.

Note: Attribute AT-R001 is implied by the 'Message Name', 'pacs.004.001.09', the 'Original Message Name Identification' set to 'pacs.008', 'Reason' under 'Return Reason Information' set to "FOCR" and 'Payment Type Information' mentioning "INST" (Transaction is related to an Instant Credit Transfer) under 'Local Instrument/Code'.

Note: Message elements under 'Original Transaction Reference' sequence are based on DS-02 attributes. Although the DS-07 Dataset refers to an "exact copy of the original inter-PSP payment dataset (DS-02) which is being recalled", this is not feasible as the pacs.004 message does not contain all the original DS-02 elements under 'Original Transaction Reference'

2.7 Negative Response to OCT Inst Recall Dataset (DS-07)

2.7.1 Use of Resolution of Investigation (camt.029.001.09)

In the context of a Recall of an OCT Inst, this message is to be used to transmit a negative response to a:

- Recall message (FI-to-FI Payment Cancellation Request, camt.056.001.08);
- Request for Status Update on a previously issued OCT Inst Recall request (FI-to-FI Payment Status Request, pacs.028.001.03, refer to section 'Request for Status Update on a Recall of an OCT Inst' below);

where the following apply:

- Index 3.0 'Status': only sub-element 'Confirmation' can be used, populated with "RJCR" (Rejected Cancellation Request) only.
- Index 4.21 'Additional Information' under 'Cancellation Status Reason Information':
 - A mandatory first occurrence starting with "ATR053/" followed by the information as per attribute description 'The specific reference of the Euro Leg-Based Payer's PSP initiating the OCT Inst Recall'.
 - In addition:
 - if index 4.19 'Code' under 'Reason' is set to "LEGL", two further occurrences are allowed to precise the reason and these must start with "ATR057/", and/or
 - if 'Code' under 'Reason' was "FRAD" (Fraudulent originated SCT Inst) in the camt.056.001.08 (DS-06), then up to ten further optional occurrences are allowed, all starting with "FRAD/" followed by all information available to file a legal claim to recover the funds in case of reason code 'Fraudulent originated OCT Inst'.
 - As a consequence, the 'EOL Mult.' is set to [1..13].

The message caters for a single or group negative response.

Note: Attribute AT-R001 'The type of R-message' is implied by the 'Message Name', 'camt.029.001.09', the 'Original Message Name Identification' set to 'pacs.008', 'Status' set to "RJCR" and 'Payment Type Information' mentioning "INST" (Transaction is related to an Instant Credit Transfer) under 'Local Instrument/Code'.

Note: Message elements under 'Original Transaction Reference' sequence are based on DS-02 attributes. Although the DS-07 Dataset refers to an "exact copy of the original inter-PSP payment dataset (DS-02) which is being recalled", this is not feasible as the camt.029 message does not contain all the original DS-02 elements under 'Original Transaction Reference'.

2.7.2 Message Element Specifications

The reasons for non-acceptance of the OCT Inst Recall present in the Rulebook are mapped to ISO codes as follows:

ISO Code	ISO Name	EOLO Core Reason as specified in the Rulebook
AC04	Closed Account Number	Account closed.
AM04	Insufficient Funds	Insufficient funds on the Account.
ARDT	Already Returned	Already returned/rejected OCT Inst Transaction.
CUST	Customer Decision	Refusal from the Payee.
LEGL	Legal Decision	Legal reasons.
NOAS	No Answer From Customer	No response from Payee/ No response from the non-Euro Leg Payee's FI
NOOR	No Original Transaction Received	Original OCT Inst Transaction never received.

Note: Other codes can be received from the non-Euro Leg Payee's FI in accordance with Rulebook reason "Non-acceptance by the non-Euro Leg Payee's FI (with a reason to be specified)".

2.8 Request for Status Update on a Recall of an OCT Inst

2.8.1 Use of the FI to FI Payment Status Request (pacs.028.001.03)

This message is sent to the Euro Leg Exit PSP in case the Euro Leg-Based Payer's PSP did not receive a response to a Recall of an OCT Inst, where the following applies:

- Index 3.3 'Original Instruction Identification' must be populated with the 'Cancellation Identification' (AT-R053) of the related camt.056 transaction information.

In an OCT Inst context, the message can be used for a single or group status request.

Note: The use case of the message is implied by the 'Message Name', 'pacs.028.001.03', the 'Original Message Name Identification' set to 'camt.056', the population of index 3.3 'Original Instruction Identification' and 'Payment Type Information' mentioning "INST" (Transaction is related to an Instant Credit Transfer) under 'Local Instrument/Code'.

Note: Message elements under 'Original Transaction Reference' are based on DS-02 attributes.

2.9 OCT Inst Inquiry Dataset (DS-08)

2.9.1 Use of Claim Non-Receipt (camt.027.001.07)

This message is used to transport the Claim Non-Receipt from the Euro Leg-Based Payer's PSP to the Euro Leg Exist PSP, directly or through intermediaries, where the following apply:

- Index 2.1 'Identification' under 'Case' is to be populated with AT-Q002 'The specific OCT Inst inquiry reference of the Participant initiating the OCT Inst inquiry'.
- Index 5.0 'Instruction for Assignee' to be populated with AT-Q003 'Additional Information to AT-Q001 OCT Inst Inquiry reason code'.
- Index 5.1 'Code' under 'Instructions for Assignee' only to be populated with "INQR" (Inquiry Reason).

The message caters for a single claim only.

Note: Attribute AT-Q001 'The OCT Inst inquiry reason code' is implied by the 'Message Name', 'camt.027.001.07' and the 'Original Message Name Identification' set to 'pacs.008'.

Note: Message elements under 'Original Transaction Reference' sequence are based on DS-02 attributes. Although the DS-08 Dataset refers to an "exact copy of the original inter-PSP payment dataset (DS-02) which the OCT Inst Inquiry relates to", this is not feasible as the camt.027 message does not contain all the original DS-02 elements under 'Original Transaction Reference'.

2.10 Positive Response to OCT Inst Inquiry Dataset (DS-09)

2.10.1 Use of Resolution of Investigation (camt.029.001.09)

This message is used to transmit a positive response to a:

- OCT Inst Inquiry message (Claim Non-Receipt, camt.027.001.07);
- Request for Status Update on an OCT Inst Inquiry message (FI-to-FI Payment Status Request, pacs.028.001.03, refer to section 'Request for Status Update on an OCT Inst Inquiry' below);

where the following apply:

- Index 2.1 'Identification' under 'Resolved Case' to be populated with AT-Q002 'The specific OCT Inst inquiry reference of the Participant initiating the OCT Inst inquiry'.
- Index 3.0 'Status': only sub-element 'Confirmation' is allowed, populated with "ACNR" (Accepted Claim Non Receipt) only.
- Under index 6.0 'Claim Non Receipt Details', only index 6.1 'Accepted' and the relevant sub-elements are allowed.
- Under index 9.0 'Resolution Related Information', only the following are allowed:
 - 9.5 'Interbank Settlement Date' must be populated with AT-T052 'The Settlement Date of the non-Euro Leg of the OCT Inst';
 - 9.8 'Charges' and relevant sub-elements, to accommodate AT-Q007 'Fee for handling the OCT Inst Inquiry'.

In the context of a Claim Non-Receipt, the message caters for a single response only.

Note: The use case of the message is implied by the 'Message Name', 'camt.029.001.09', the 'Original Message Name Identification' set to 'pacs.008' and 'Status' set to "ACNR".

Note: Message elements under 'Original Transaction Reference' sequence are based on DS-02 attributes. Although the DS-09 Dataset refers to an "exact copy of the original inter-PSP payment dataset (DS-02) which the OCT Inst Inquiry relates to", this is not feasible as the camt.029 message does not contain all the original DS-02 elements under 'Original Transaction Reference'.

Note: A positive response confirms that the non-Euro Leg Payee's FI has credited the initial OCT Inst Transaction on the Account of the Payee. The Euro Leg Exit PSP provides the Euro Leg-Based Payer's PSP with the date on which this OCT Inst Transaction has been credited.

Note: The payment of the charges is to be effectuated according to the current inter-PSP practices related to such matters. It is recommended to use the pacs.008 as described for this specific usage as per below section 'Inter-PSP Fee OCT Inst Inquiry Fee Payment'. When paying the charges, the Euro Leg-Based Payer's PSP must provide AT-Q002 'The specific OCT Inst inquiry reference of the Participant initiating the OCT Inst inquiry' and AT-Q009 'Reference of the Euro Leg Exit PSP for the OCT Inst Inquiry fee payment' in order to allow the Euro Leg Exit PSP to allocate the payment to the right case. Moreover, the IBAN provided under 'Resolution Related Information/Charges' is the one corresponding to AT-Q008 'The unique identifier of the account to be credited at the Euro Leg Exit PSP' in the inter-PSP payment message.

2.11 Negative Response to OCT Inst Inquiry Dataset (DS-09)

2.11.1 Use of Resolution of Investigation (camt.029.001.09)

This message is used to transmit a negative response to a:

- OCT Inst Inquiry message (Claim Non-Receipt, camt.027.001.07);
- Request for Status Update on an OCT Inst Inquiry message (FI-to-FI Payment Status Request, pacs.028.001.03, refer to section 'Request for Status Update on an OCT Inst Inquiry' below);

where the following apply:

- Index 3.0 'Status': only sub-element 'Confirmation' is allowed, populated with "RJNR" (Rejected Claim Non Receipt) only.
- Under index 6.0 'Claim Non Receipt Details', only index 6.2 'Rejected' is allowed, populated with "ARDT" (Already Returned Transaction), "ARJT" (Already Rejected Transaction), "NOOR" (No Original Transaction Received), or "RR04" (Regulatory Reason) only.

In the context of a Claim Non-Receipt, the message caters for a single response only.

Note: The use case of the message is implied by the 'Message Name', 'camt.029.001.09', the 'Original Message Name Identification' set to 'pacs.008' and 'Status' set to "RJNR" (Rejected Claim Non-Receipt).

Note: Message elements under 'Original Transaction Reference' sequence are based on DS-02 attributes. Although the DS-09 Dataset refers to an "exact copy of the original inter-PSP payment dataset (DS-02) which the OCT Inst Inquiry relates to", this is not feasible as the camt.029 message does not contain all the original DS-02 elements under 'Original Transaction Reference'.

Note: A negative response implies that a Claim Non-Receipt is rejected by the non-Euro Leg Payee's FI. Also, please refer to the description in the message below under the 'Claim Non-Receipt Details' block.

2.12 Inter-PSP OCT Inst Inquiry Fee Payment Dataset (DS-11)

2.12.1 Use of FI to FI Customer Credit Transfer (pacs.008.001.08)

The message is used to transport the instruction related to the payment of an inter-PSP fee for handling the OCT Inst inquiry in case of a positive response to an OCT INST inquiry for the reason 'Claim of Non-Receipt'.

The message caters for the settlement of a single OCT Inst inquiry fee only.

Note: The use case of the message is implied by the 'Name', 'pacs.008.001.08', with 'Category Purpose' set to "FCOL" (Fee Collection).

2.13 Request for Status Update on an OCT Inst Inquiry

2.13.1 Use of FI To FI Payment Status Request (pacs.028.001.03)

A pacs.028 message can be sent to the Euro Leg Exit PSP in case the Euro Leg-Based Payer's PSP did not receive a response to an OCT Inst Inquiry (i.e. Claim Non-Receipt). In this context, the following applies:

- Index 3.3 'Original Instruction Identification' must be populated with the case ID (AT-Q002) of the related camt.027.

In an OCT Inst context, the message is used for a single status request only.

Note: Attribute AT-Q001 'SCT inquiry reason code' is implied by the 'Message Name' set to 'pacs.028.001.03' and the 'Original Message Name Identification' set to 'camt.027' (Claim Non-Receipt).

Note: Message elements under 'Original Transaction Reference' are based on DS-02 attributes.

2.14 OCT Inst Transaction Status Investigation Dataset (DS-10)

2.14.1 Use of FI To FI Payment Status Request (pacs.028.001.03)

This message is sent to the Euro Leg Exit PSP in case the Euro Leg-Based Payer's PSP has not received a confirmation (positive or negative) five seconds after the time-out deadline.

The message caters for a single status request only.

Note: The use case of the message is implied by the 'Message Name' set to 'pacs.028.001.03', the 'Original Message Name Identification' set to 'pacs.008' and 'Payment Type Information' mentioning "INST" (Transaction is related to an Instant Credit Transfer) under 'Local Instrument/Code'.

Note: Message elements under 'Original Transaction Reference' are based on DS-02 attributes.
