0 Background

The EPC issues implementation guidelines that are based on the ISO 20022 standard for the customer¹-to-PSP (C2PSP) space as well as the inter-PSP space. The recommendations on ISO 20022 PSP-to-customer (PSP2C) account information represent the third and final link in the chain, as requested by stakeholders. It should however be noted that the development of PSP2C implementation guidelines is not seen as a viable option in view of the following barriers:

- Statements need to report on both SEPA and non-SEPA payments (i.e. different rules apply).
- Statements need to report on non-payment transactions such as securities and trade finance.
- No European Standard on the use of Bank Transaction Codes.
- A level of complexity required which is currently not recognised in the SEPA rulebooks. The rulebooks only refer to the PSP reporting to the receiving party (and not to the PSP reporting back to the instructing party). Moreover, there are a number of different transactions tied to a SEPA payment, the so-called R-transactions, for example the return of a credit transfer or a reversal of a direct debit, and the inquiries on SCT transactions.

It is therefore agreed that a mapping exercise as described in the below introduction section presents a helpful alternative.

This document takes into account the following changes (effective as from **17 March 2024**²):

- Migration to the 2019 message version of the ISO 20022 standard.
- Alignment of the attribute numbering between the four SEPA payment scheme rulebooks.

1 Introduction

1.1 Aim of the document

The aim of this document is to present a mapping of the rulebook requirements vis-à-vis the 'Transaction Details' message elements of the ISO 20022 reporting messages. In terms of reporting

¹ The term 'Customer' is to be understood as 'Payment Service User' (PSU), meaning a natural or legal person making use of a payment service in the capacity of payer, payee, or both. Such person can take up the role of Originator and/or Beneficiary under the Scheme.

² On 24 October 2023, the EPC decided that the migration of the SCTs and SDDs schemes to the 2019 message version of ISO 20022 would be postponed to 17 March 2024. Consequently, the initial entry-into-force date of the 2023 SCTs and SDDs rulebooks and related IGs has been postponed from 19 November 2023 to 17 March 2024.

to the receiving party, i.e. the beneficiary of a credit transfer (SCT or SCT Inst) and the debtor of a direct debit (SDD Core or SDD B2B), the PSP2C account information as described in the relevant dataset in the rulebooks is in fact a minimum. Moreover, it appears that, for matters of good common understanding, the PSP2C dataset as reported in the rulebooks is not always sufficient. In order to propose a more extensive view of the PSP2C possibilities, the present document relies on the inter-PSP information received by the PSP of the recipient. At the current stage, this document does still deal only with the information provided by the PSP of the recipient to the recipient of the payment. The PSP2C information for the sender, i.e. the originator of the credit transfer (SCT or SCT Inst) or the creditor of the direct debit (SDD Core or SDD B2B) is not covered. Nor are the R-transactions or the inquiry processes taken into account.

Note: This document provides a mapping of DS-02 (SCT & SCT Inst)/DS-04 (SDD Core & B2B) attributes towards possible ISO 20022 elements notwithstanding that legal requirements or banking usage rules may prevent the information to be passed on to the payment recipient.

Consequently, this document takes into consideration:

- At EPC level:
 - DS-02 of the SCT/SCT Instant Rulebook 2023 v1.1/v1.2, The inter-PSP payment dataset
 - DS-04 of the SDD Rulebooks, Core and B2B 2023 v1.1, The Inter-PSP Collection
- At ISO level the following reporting messages:
 - Camt.052.001.08 BankToCustomerAccountReportV08
 - Camt.053.001.08 BankToCustomerStatementV08
 - Camt.054.001.08 BankToCustomerDebitCreditNotificationV08

This document does not provide guidance for other reporting situations than those mentioned above.

1.2 Content of the document

For the SCT schemes on one side and the SDD schemes on the other side, this document proposes:

- A table of the dataset (DS) attributes and the corresponding elements in the relevant camt messages.
- An abstract of the camt messages populated with the DS attributes.

Being a mapping exercise, this document does not provide any usage rules.

Most of the DS attributes fit into the “transaction details” section of the “entry/entry details” level in all three camt messages. Some of them can or must be used at a higher level. Depending on whether they batch entries on the account, or depending on their agreements with their customers, PSPs may use ‘higher’ levels elements of the message in order to reflect the DS Attributes.

In this document, only the relevant elements to accommodate the DS attributes are displayed. When an element reflecting a DS attribute contains several sub-elements, the latter are not displayed. They must be populated in the camt messages as they are in the relevant pacs message

PSPs may also report on more information than the content of the DSs and as a consequence use additional elements to those described in this document.

2 SCT

2.1 SCT/SCT ERI DS-02 attributes and the corresponding elements in the “TransactionDetails” section of the relevant camt messages

The description below applies when the customer (i.e. beneficiary) wishes to receive the detailed information of a transaction under “Entry Details”. Depending on the agreement between the customer and his/her PSP and the reporting message used, the information may be displayed differently when, for example, the customer asks for a globalised posting in the account statement message (camt.053) and a detailed entry report in the notification message (camt.054).

2.3 “TransactionDetails” section of the ‘camt’ messages populated with the DS-02 attributes

The description below applies when the customer (i.e. beneficiary) wishes to receive the detailed information of a transaction under “Entry Details”. Depending on the agreement between the customer and his/her PSP and the reporting message used, the information may be displayed differently when, for example, the customer asks for a globalised posting in the account statement message (camt.053) and a detailed entry report in the notification message (camt.054).

The three considered camt messages are structured as follows:

Camt.052	Camt.053	Camt.054
+ GroupHeader	+ GroupHeader	+ GroupHeader
+ Report	+ Statement	+ Notification
++ Entry	++ Entry	++ Entry
+++ EntryDetails	+++ EntryDetails	+++ EntryDetails
++++ TransactionDetails	++++ TransactionDetails	++++ TransactionDetails

The description below applies to the TransactionDetails section of the messages. Only the elements immediately below TransactionsDetails (i.e. elements tagged with 5 ‘+’) are all mentioned. Under such elements, only those reflecting DS Attributes are expanded with sub-elements if any.

3.2 “TransactionDetails” section of the camt messages populated with the DS-04 attributes

The description below applies when the customer (i.e. debtor) wishes to receive the detailed information of a transaction under “Entry Details”. Depending on the agreement between the customer and his/her PSP and the reporting message used, the information may be displayed differently when, for example, the customer asks for a globalised posting in the account statement message (camt.053) and a detailed entry report in the notification message (camt.054).

The three considered camt messages are structured as follows:

Camt.052	Camt.053	Camt.054
+ GroupHeader	+ GroupHeader	+ GroupHeader
+ Report	+ Statement	+ Notification
++ Entry	++ Entry	++ Entry
+++ EntryDetails	+++ EntryDetails	+++ EntryDetails
++++ TransactionDetails	++++ TransactionDetails	++++ TransactionDetails

The description below applies to the TransactionDetails section of the messages. Only the elements immediately below TransactionsDetails (i.e. elements tagged with 5 ‘+’) are all mentioned. Under such elements, only those reflecting DS Attributes are expanded with sub-elements if any.

Mult	Message Element Camt.052/053/054	SDD Core / SDD B2B DS-04 - The Inter-PSP Collection
