### **Important update**

**As of 15 November 2026, the unstructured address format can no longer be provided in EPC payment messages.**

In this document, every reference to 22 November 2026 is no longer valid and has to be read as 15 November 2026.

# SEPA Credit Transfer Scheme

## Inter-PSP Implementation Guidelines

EPC115-06 / 2025 Version 1.0 / Date issued: 28 November 2024 / Date effective: 5 October 2025

Public

### **Abstract**

This document sets out the rules for implementing Version 1.1 of the 2025 SEPA Credit Transfer Scheme Rulebook, based on the 2019 message version of the ISO 20022 standard.

## 0.3 Purpose of Document

The objective of these Guidelines is to define the rules to be applied to the inter-Payment Service Provider (PSP) ISO 20022 XML message standards for the implementation of the SEPA Credit Transfers as defined in the SEPA Credit Transfer Scheme Rulebook.

**Note:** The term “bank” has been replaced by “PSP” in all the EPC SEPA payment scheme rulebooks and associated implementation guidelines to formally reflect the changes introduced by the Payment Services Directive (PSD) to the categories of institutions that can offer payment services, and the variety in PSP categories that are eligible to adhere to the EPC SEPA payment schemes. However, please note that in the context of ISO, the term “bank” is still used.

**Note:** The term 'Customer' is to be understood as 'Payment Service User' (PSU), meaning a natural or legal person making use of a payment service in the capacity of payer, payee, or both. Such person can take up the role of Originator and/or Beneficiary under the Scheme."

## 1 INTRODUCTION

This document sets out the SEPA rules for implementing the inter-PSP credit transfer ISO 20022 XML message standards. The SEPA Credit Transfer Scheme Rulebook defines data sets which are implemented in the relevant ISO 20022 XML message standard as follows:

SEPA Credit Transfer Scheme Rulebook	ISO 20022 XML Message Standards
DS-02 <i>Inter-PSP Payment Dataset</i> DS-11 <i>Inter-PSP Fee and/or Compensation Payment Dataset</i>	FI to FI Customer Credit Transfer (pacs.008.001.08)
DS-03 <i>Reject or Return Credit Transfer Dataset</i>	Return – Payment Return (pacs.004.001.09) Reject – FI to FI Payment Status Report (pacs.002.001.10)
DS-05 <i>Recall of Credit Transfer Dataset</i>	FI to FI Payment Cancellation Request (camt.056.001.08)
DS-06 <i>Response to Recall of Credit Transfer Dataset</i>	Negative Response: Resolution of Investigation (camt.029.001.09) Positive Response: Payment Return (pacs.004.001.09)
DS-07 <i>Request for Recall by the Originator Dataset</i>	FI to FI Payment Cancellation Request (camt.056.001.08)
DS-08 <i>Response to the Request for Recall by the Originator Dataset</i>	Negative Response: Resolution of Investigation (camt.029.001.09) Positive Response: Payment Return (pacs.004.001.09)
<i>Request for Status Update on a Request for Recall (step CT-02.07 under 4.3.2.3)</i> <i>Request for Status Update on a Request for Recall by the Originator (step 4C under 4.3.2.4)</i>	FI To FI Payment Status Request (pacs.028.001.03)
DS-09 <i>SCT Inquiry Dataset</i>	Claim Non-Receipt (camt.027.001.07) Request to Modify Payment (camt.087.001.06)
DS-10 <i>Response-to-SCT-Inquiry Dataset</i>	Negative/Positive Response: Resolution of Investigation (camt.029.001.09)
<i>Request for Status Update on a SCT Inquiry (step iii under 4.4.1)</i>	FI To FI Payment Status Request (pacs.028.001.03)

The Guidelines for the inter-PSP credit transfer message standards are mandatory.

## 1.1 Coverage of the SEPA Implementation Guidelines

The purpose of the SEPA Implementation Guidelines, hereafter referred to as the Guidelines, is to provide guidance on the use of the Global ISO 20022 XML standards in making SEPA core payments as defined in the SEPA scheme rulebooks and supplemented by processing requirements.

The Guidelines are fully aligned to the SEPA core requirements as defined in the Rulebook and identify message elements needed for inter-PSP processing while recognising message elements that may be available for use in Additional Optional Services (AOS), as shown below.

Global ISO 20022 XML Message Standards			
Message elements from the ISO messages corresponding to Rulebook requirements	Message elements that are mandatory in the ISO messages or needed for Inter-PSP Processing	Message elements from the ISO messages available for use by AOS within an EPC Governance framework	Message elements from ISO messages not applicable to SEPA
<b>EPC Implementation Guidelines for SEPA Core Mandatory subset, identifying elements</b> <ul style="list-style-type: none"> <li>- to be used as defined in ISO</li> <li>- to be used with SEPA usage rules (from or completing the Rulebook)</li> </ul> <b>Note: yellow fields can be used in a specific way for an AOS.</b>		<b>To be developed and documented by AOS Communities</b>	<b>Not available for use in SEPA payments</b>
<b>SEPA Payments</b>			

Figure 1

These Guidelines define the SEPA Core Mandatory Subset<sup>2</sup> of the Global ISO 20022 XML standard that consists of message elements:

- required in the Rulebook as business requirements
- needed for processing by PSPs and clearing and settlement mechanisms

These message elements define the **SEPA core service** and are denoted by yellow shading in the message structures given in the following chapters. Only these elements are further detailed with relevant SEPA core requirements, such as the use of the message element, its components or the values that must be used. Usage rules, for example, may indicate limits on the number of repetitions, or code value restrictions, while format rules may be used to indicate the allowable combinations of components of a message element.

<sup>2</sup> The SEPA Core Mandatory Subset is hereafter known as the SEPA core service.

These Guidelines also recognise message elements and the usage rules in the ISO 20022 XML standard that may be available for use in an AOS, subject to a governance framework to be defined by the EPC. The definition and documentation of these message elements are a matter for the AOS communities involved. These message elements are denoted by white shading.

Where there are message elements that do not apply to SEPA payments, these are denoted with red shading in the right-most column of the message structures. To date, few such message elements have been identified.

## 1.2 Use of these Guidelines by the instructing and instructed parties<sup>3</sup>

- SEPA core payments are executed using messages only containing message elements defined as part of the SEPA Core Mandatory Subset (shaded yellow in Figure 2).
- Payments that include message elements that are defined and documented by AOS communities (shaded white/yellow in Figure 2) are considered as SEPA payments, but not as SEPA core payments.
- It is the responsibility of the instructing PSP of the message to ensure that message elements defined for use in an AOS are only included in messages sent to AOS community members.
- The instructed PSP receiving a message containing AOS-related message elements, but which is not a member of the AOS community, may ignore the information, that is, not use it for processing, nor forward it to the next party in the chain. The instructed PSP, however, may reject the message for this reason.

## 1.3 Notation Conventions

The Guidelines are presented in a similar format than the one used in the ISO 20022 XML standard.

#	SEPA Mul	Message Element	SEPA Core Requirements
1.00	1..1	Message root +Group Header ++Sublevel 1 +++Sublevel 2	<i>SEPA Usage Rule(s)</i> (e.g. Mandatory) <i>SEPA Format Rule(s)</i> ISO Name ISO Definition XML Tag Type  (Yellow: Message Element that is part of the SEPA Core Service)
	1..1		<b>XML Tag</b> xs:choice

<sup>3</sup> Instructing and instructed parties include CSMs.

1.01	1..1	Message root +Group Header ++Sublevel 1 +++Sublevel 2 ++++Sublevel 3	<b>SEPA Rulebook</b> (Attribute used in Rulebook) <b>SEPA Usage Rule(s)</b> (e.g. Only 'SEPA' is allowed.) <b>ISO Name</b> <b>ISO Definition</b> <b>XML Tag</b> <b>Type</b> <b>ISO Length</b> <b>SEPA Length</b>  (Yellow: Message Element that is part of the SEPA Core Service)
			<b>SEPA Code restrictions</b>
			<b>SEPA</b> <i>SingleEuroPaymentsArea</i> <i>Payment must be executed following the Single Euro Payments Area scheme.</i>
1.02	1..1	Message root +Group Header ++Sublevel 1 +++Sublevel 2 ++++Sublevel 3	<b>ISO Name</b> <b>ISO Definition</b> <b>XML Tag</b> <b>Type</b>  (White: Message Element that is not part of the Core Service but is available for use in a SEPA AOS)
1.0n	0..1	Message root +Group Header ++Sublevel 1	<b>ISO Name</b> <b>ISO Definition</b> <b>XML Tag</b> <b>Type</b>  (Red: Message Element that is not to be used in SEPA Payments)

Figure 2

Where:

- Column 1 indicates the message element Index number specific to these Implementation Guidelines. .

Components of message elements that are not allowed in SEPA payments or where no SEPA requirements are defined are not displayed in full as the ISO 20022 XML standard applies.

- Column 2 indicates the mandatory or optional status and the number of repetitions defined by the SEPA Core Requirements, e.g.:
  - 0..1 element is optional and may only be present once
  - 0..n element is optional with unlimited repetition
  - 1..1 element is mandatory and must be present exactly once
  - 1..n element is mandatory with unlimited repetition

The displayed SEPA multiplicity may thus differ from the one of the ISO 20022 XML standard. When an element is shaded yellow, possible remaining ISO 20022 occurrences are available for use in an AOS.

Empty elements are not allowed (i.e. a message shall not contain elements without content).

- Column 3 indicates the full path of an element where the last line contains the name of the message element as defined in the ISO 20022 XML standard.

When an element contains sub-elements these are indented to the right and noted with a plus sign (+) per level.

- Column 4 specifies in italic characters the SEPA Core Requirements as additional rules to those specified in the ISO 20022 XML standard, which are shown in non-italic characters.
  - When defined in the Rulebook, the attribute is indicated by the attribute name and where applicable, the number, i.e., AT-XXXX. Those message elements are shaded yellow.
  - When the message element relates to inter-PSP processing requirements, it is shaded yellow.
  - When the message element specified in the ISO 20022 XML standard is used for SEPA payments without change (regarding the definition and any usage rules), no specific SEPA Core requirements are provided and is shaded yellow.
  - When the message element is specified in the ISO 20022 XML standard as optional, but is mandatory in SEPA Core requirements, this is specified as 'Mandatory' and is shaded yellow.
  - When the message element is not available for use in SEPA payments, this is indicated with red shading. Note that these message elements are similarly not available for use in an AOS.
  - The SEPA length is indicated for every message element (if applicable), even if it is the same length as in the ISO 20022 XML standard.

Column 4 may also indicate conditional relations between message components or elements, e.g. either component 1 or component 2 must be present, component 1 and component 2 are mutually exclusive. For XML Tag "xs:choice" (containing just one subsequent component or element due to applied restrictions on subsequent components or elements) column 4 may indicate, that the "choice" nature is lost due to applied restrictions i.e. only one element is shaded yellow.

## 1.4 Character Set

The character set issue centres on the use of the full set characters in the message elements. Two considerations are:

- While PSPs must be allowed to use the character set currently in use at national level,
- PSPs throughout SEPA cannot be required to support the full character set used in SEPA countries.

Therefore:

- The ISO 20022 XML messages allow for the full range of global language requirements (UTF-8).
- PSPs must be able to support the Latin character set commonly used in international communication, as follows:

a b c d e f g h i j k l m n o p q r s t u v w x y z  
A B C D E F G H I J K L M N O P Q R S T U V W X Y Z  
0 1 2 3 4 5 6 7 8 9

/ - ? : ( ) . , ' +

Space

- References, identifications and identifiers must respect the following [9]:
  - Content is restricted to the Latin character set as defined above
  - Content must not start or end with a '/'
  - Content must not contain '//'

Note: When a slash is used as delimiter between the attribute number (AT-XXXX) or code (ABCD) and the data content, no space is allowed directly after this slash.

However, there may be bilateral or multilateral agreements to support one or more sets of characters beyond the Latin character set referred to above.

## 1.5 General Message Element Specifications

### 1.5.1 BIC

The BIC used to identify financial institutions (Agents in the ISO 20022 XML standards) may be either BIC 11 or BIC 8.

Depending on the version of the ISO 20022 message used, the BIC of a financial institution may be populated either in a <BIC> or in a <BICFI> element (Note: the latter applies to the pacs.028.001.01, camt.027.001.06, camt.087.001.05 and camt.029.001.08 messages).

### 1.6 Implementation of ISO 20022 XML rules

This document should be read in conjunction with the ISO 20022 XML message standards.

### 1.7 Change Over Date

As from the change-over date, receiving PSPs may only receive messages, including the r-messages, in the new version.

**Note: As of 22 November 2026, only the use of structured and hybrid addresses will be allowed (i.e. the provision of unstructured addresses is no longer allowed as from this date). For further details, please see EPC Guidance Document "Provision of Addresses under the EPC Payment Schemes" [10].**

## **2 MANDATORY PSP-TO-PSP MESSAGES**

### **2.1 Inter-PSP Payment Dataset (DS-02)**

#### **2.1.1 Use of FI to FI Customer Credit Transfer (pacs.008.001.08)**

The message is used to transport the Payment instruction from the Originator PSP to the Beneficiary PSP, directly or through intermediaries.

The message caters for bulk and single payment instructions.

**Note:** It is allowed to send a mix of DS-02 and DS-11 transactions, i.e. one pacs.008.001.08 message can contain 'Credit Transfer Transaction Information' blocks as per DS-02 (the present section) and DS-11 (Inter-PSP Fee and/or Compensation Payment, refer to section 2.19). In such case:

- 'Payment Type Information' must be present only in 'Credit Transfer Transaction Information' in order to allow mentioning under 'Category Purpose' the codes necessary for such Fee and/or Compensation Payment transactions,
- 'Credit Transfer Transaction Information' block(s) relating to DS-11 transaction(s) must be formatted as per section 2.19 (not 2.1).

**Note:** The present section only describes the transactions as per DS-02, i.e. the Inter-PSP Payment Dataset.

## 2.2 Inter-PSP Return SEPA Credit Transfer Dataset (DS-03)

### 2.2.1 Use of the Payment Return (pacs.004.001.09)

The message is used to transport the Credit Transfer Return instruction between PSPs, directly or through intermediaries.

The message can also be used to return instructions of SEPA Credit Transfers with Extended Remittance Information (ERI, please refer to section 'Inter-PSP payment with use of the Extended Remittance Information option' below) whereby only AT-T010 'The unstructured Remittance Information sent by the Originator to the Beneficiary in the SEPA Credit Transfer Instruction' will be forwarded.

The message caters for bulk and single return instructions.

**Note:** Attribute AT-R001 'The Type of R-message' is implied by the 'Message Name', 'pacs.004.001.09', and the 'Original Message Name Identification' must begin with pacs.008 (the addition of a variant number and version number is optional).

**Note:** Message elements under 'Original Transaction Reference' sequence are based on DS-02 attributes.

## 2.2.2 Message Element Specifications

Reasons for an inter-PSP **return** present in the Rulebook are mapped to the ISO codes as follows:

ISO Code	ISO Name	SEPA Core Reason as specified in the Rulebook
AC01	IncorrectAccountNumber	Account identifier invalid (i.e. invalid IBAN or account number does not exist)
AC04	ClosedAccountNumber	Account closed
AC06	BlockedAccount	Account blocked, reason not specified
AG01	TransactionForbidden	Credit transfer forbidden on this type of account (e.g. savings account)
AG02	InvalidBankOperationCode	Operation/transaction code incorrect, invalid file format <i>Usage Rule:</i> To be used for incorrect 'operation/transaction' code or invalid file format.
AM05	Duplication	Duplicate payment
BE04	MissingCreditorAddress	Account address invalid
CNOR	Creditor bank is not registered	Creditor PSP is not registered under this BIC in the CSM
ERIN	ERIOptionNotSupported	The Extended Remittance Information (ERI) option is not supported
MD07	EndCustomerDeceased	Beneficiary deceased
MS02	NotSpecifiedReasonCustomerGenerated	By order of the Beneficiary
MS03	NotSpecifiedReasonAgentGenerated	Reason not specified
RC01	BankIdentifierIncorrect	PSP identifier incorrect, eg, invalid BIC
RR01	MissingDebtorAccountOrIdentification	Regulatory Reason
RR02	MissingDebtorsNameOrAddress	Regulatory Reason
RR03	MissingCreditorsNameOrAddress	Regulatory Reason
RR04	RegulatoryReason	Regulatory Reason

## 2.3 Inter-PSP Reject SEPA Credit Transfer Dataset (DS-03)

### 2.3.1 Use of the FI to FI Payment Status Report (pacs.002.001.10)

When the code "RJCT" (Rejected) is used in the 'Status Reason', the message transports the Credit Transfer Reject instruction between PSPs, directly or through intermediaries.

The message can also be used to reject instructions of SEPA Credit Transfers with Extended Remittance Information (ERI, please refer to section 'Inter-PSP payment with use of the Extended Remittance Information option' below) whereby only AT-T010 'The unstructured Remittance Information sent by the Originator to the Beneficiary in the SEPA Credit Transfer Instruction' will be forwarded.

The message caters for bulk and single reject instructions.

**Note:** Attribute AT-R001 'The type of R-message' is implied by the 'Message Name', 'pacs.002.001.10', the 'Original Message Name Identification' must begin with pacs.008 (the addition of a variant number and version number is optional) and 'Status' set to "RJCT".

**Note:** Attribute AT-R005 'The Settlement Date for the Return' is not applicable to rejects.

**Note:** Message elements under 'Original Transaction Reference' sequence are based on DS-02 attributes.

### 2.3.2 Message Element Specifications

The reasons for an inter-PSP reject present in the Rulebook are mapped to ISO codes as follows:

ISO Code	ISO Name	SEPA Core Reason as specified in the Rulebook
AC01	IncorrectAccountNumber	Account identifier incorrect (i.e. invalid IBAN)
AG02	InvalidBankOperationCode	Operation/transaction code incorrect, invalid file format <i>Usage Rule:</i> To be used for incorrect 'operation/transaction' code.
AM05	Duplication	Duplicate payment
ED05	SettlementFailed	Settlement of the SEPA Credit Transfer has failed
ERIN	ERIOptionNotSupported	The Extended Remittance Information (ERI) option is not supported
FF01	InvalidFileFormat	Operation/transaction code incorrect, invalid file format
MS03	NotSpecifiedReasonAgentGenerated	Reason not specified
RC01	BankIdentifierIncorrect	PSP identifier incorrect (i.e. invalid BIC)
RR01	MissingDebtorAccountOrIdentification	Regulatory Reason
RR02	MissingDebtorsNameOrAddress	Regulatory Reason
RR03	MissingCreditorsNameOrAddress	Regulatory Reason
RR04	RegulatoryReason	Regulatory Reason
TM01	CutOffTime	File received after Cut-off Time
DNOR	DebtorBankIsNotRegistered	Debtor PSP is not registered under this BIC in the CSM
CNOR	CreditorBankIsNotRegistered	Creditor PSP is not registered under this BIC in the CSM

## 2.4 Inter-PSP Recall of SEPA Credit Transfer Dataset (DS-05)

### 2.4.1 Use of FI-to-FI Payment Cancellation Request (camt.056.001.08)

The message is used to submit the request to cancel a pacs.008 or to cancel specified transactions from the Originator PSP to the next PSP in the chain or to the CSM, or from the CSM to the next PSP in the chain, where the following apply:

- Index 4.3 'Cancellation Identification' can only be populated with AT-R053 'The specific reference of the Originator PSP initiating the Recall'.
- Index 4.19 'Originator' can only be populated with AT-R002 'Identification of the type of party initiating the "R"-message'.
- Index 4.20 'Reason' is to be populated with AT-R051 'The Recall reason code'.
- Index 4.21 'Code' can only be populated with ISO codes "DUPL" (Duplicate payment), "TECH" (Technical problem) and "FRAD" (Fraudulent origin).
- Index 4.23 'Additional Information' is allowed only when "FRAD" is used as Recall reason code and in such case is to be populated with AT-R052 'Additional Information to AT-R051 The Recall reason code'.

The message can also be used to recall a SEPA Credit Transfer with Extended Remittance Information (ERI, please refer to section 'Inter-PSP payment with use of the Extended Remittance Information option' below) whereby only AT-T010 'The unstructured Remittance Information sent by the Originator to the Beneficiary in the Credit Transfer Instruction' will be forwarded.

The message caters for single or group cancellation requests. Group cancellation requests allow recall of single or multiple transactions from single or multiple original messages.

**Note:** Attribute AT-R001 'Type of R-message' is implied by the 'Message Name', 'camt.056.001.08', the 'Original Message Name Identification' must begin with pacs.008 (the addition of a variant number and version number is optional) and 'Reason' set to "DUPL", "TECH" or "FRAD" (under 'Code').

**Note:** Message elements under 'Original Transaction Reference' sequence are based on DS-02 attributes.

**Note:** Only one Recall can be sent for a given SCT Transaction during the periods mentioned in the SCT Rulebook [1]. The Originator PSP is not allowed to send another Recall for the same initial SCT Transaction.

	1..1	FITo FIPayment Cancellation Request V08	<b>ISO Name</b> <b>ISO Definition</b>	FITo FIPayment Cancellation Request V08 Scope The FIToFIPaymentCancellationRequest message is sent by a case creator/case assigner to a case assignee. This message is used to request the cancellation of an original payment instruction. The FIToFIPaymentCancellationRequest message is exchanged between the instructing agent and the instructed agent to request the cancellation of an interbank payment message previously sent (such as FIToFICustomerCreditTransfer, FIToFICustomerDirectDebit or FinancialInstitutionCreditTransfer).  The FIToFIPaymentCancellationRequest message supports both the request for cancellation (the instructed agent - or assignee - has not yet processed and forwarded the payment instruction) as well as the request for refund (payment has been fully processed already by the instructed agent - or assignee).

## 2.5 Inter-PSP Negative Response to a Recall of SEPA Credit Transfer Dataset (DS-06)

### 2.5.1 Use of Resolution of Investigation (camt.029.001.09)

In the context of a Recall of an SCT, this message is used to transmit a negative response to:

- a Recall of Credit Transfer message (FI-to-FI Payment Cancellation Request V01, camt.056.001.08);
- a Request for Status Update on a Recall of Credit Transfer message (FI-to-FI Payment Status Request, pacs.028.001.03, refer to section 'Request for Status Update on a Recall of Credit Transfer' below);

where the following apply:

- Index 3.0 'Status': only sub-element 'Confirmation' can be used, populated with "RJCR" (Rejected Cancellation Request) only.
- Index 4.21 'Additional Information' under 'Cancellation Status Reason Information':
  - A mandatory occurrence starting with "ATR053/" followed by the information as per attribute description 'The specific reference of the Originator PSP initiating the Recall'.
  - In addition:
    - if index 4.19 'Code' under 'Reason' is set to "LEGL", two further occurrences are allowed to precise the reason and these must start with "ATR057/", and/or
    - if 'Code' under 'Reason' was "FRAD" (Fraudulent originated SCT) in the camt.056.001.08 (DS-05), then up to ten further optional occurrences are allowed, all starting with "FRAD/" followed by all information available to file a legal claim to recover the funds in case of reason code 'Fraudulent originated SCT'.
  - As a consequence, the 'SEPA Mult.' is set to [1..13].

The message caters for a single or a group negative response.

**Note:** Attribute AT-R001 'The type of R-message' is implied by the 'Message Name', 'camt.029.001.09', the 'Original Message Name Identification' must begin with pacs.008 (the addition of a variant number and version number is optional), and 'Status' set to "RJCR".

**Note:** Message elements under 'Original Transaction Reference' sequence are based on DS-02 attributes.

## 2.6 Inter-PSP Positive Response to a Recall of SEPA Credit Transfer Dataset (DS-06)

### 2.6.1 Use of inter-PSP return credit transfer message (pacs.004.001.09)

The positive response to a:

- Recall of Credit Transfer message (camt.056.001.08);
- Request for Status Update on a Recall of Credit Transfer message (pacs.028.001.03, refer to section 'Request for Status Update on a Recall of Credit Transfer' below);

is to be made using an inter-PSP return credit transfer message (pacs.004.001.09), where the following apply:

- Index 1.9 'Interbank Settlement Date' to be populated with AT-R056 'The Settlement Date for the positive response to a Recall'.
- Index 3.13 'Returned Interbank Settlement Amount' to be populated with AT-R054 'The returned amount of a positive response to the Recall in euro'.
- Index 3.17 'Returned Instructed Amount' may be used.
- Index 3.22 'Amount' (under 'Charges Information') to be populated with AT-R055 'The fee for the positive response to the Recall in euro', if any.
- Index 3.24 'Financial Institution Identification' (under 'Agent' under 'Charges Information') to be populated with AT-C002 'The BIC code of the Beneficiary PSP'.
- Index 3.31 'Originator' to be populated with AT-R002 'The Identification of the type of party initiating the "R" message'.
- Index 3.33 'Reason/Code' (under 'Return Reason Information') to be populated only with "FOCR" (Following Cancellation Request).
- Index 3.35 'Additional Information' (under 'Return Reason Information') to be used with a mandatory occurrence starting with "ATR053/" followed by the information as per attribute description 'The Specific Reference of the Originator PSP initiating the Recall'.

The message caters for a single or a group positive response.

**Note:** Attribute AT-R001 'The type of R-message' is implied by the 'Message Name', 'pacs.004.001.09', the 'Original Message Name Identification' must begin with pacs.008 (the addition of a variant number and version number is optional) and 'Reason' under 'Return Reason Information' set to "FOCR".

**Note:** Message elements under 'Original Transaction Reference' sequence are based on DS-02 attributes.

## 2.7 Request for Status Update on a Recall of SEPA Credit Transfer

### 2.7.1 Use of the FI to FI Payment Status Request (pacs.028.001.03)

This message is sent to the Beneficiary PSP in case the Originator PSP did not receive a response to a Recall, where the following applies:

- Index 3.3 'Original Instruction Identification' must be populated with the 'Cancellation Identification' (AT-R053) of the related camt.056 transaction information.

The message caters for a single or group status request.

**Note:** The use case of the message is implied by the 'Message Name', 'pacs.028.001.03', the 'Original Message Name Identification' must begin with camt.056 (the addition of a variant number and version number is optional) and the population of index 3.3 'Original Instruction Identification'.

**Note:** Message elements under 'Original Transaction Reference' are based on DS-02 attributes.

## 2.8 Request for Recall by the Originator Dataset (DS-07)

### 2.8.1 Use of FI-to-FI Payment Cancellation Request (camt.056.001.08)

The message is used to submit the request made by the Originator to cancel a pacs.008 for other reasons than those allowed in a Recall (refer to section 'Inter-PSP Recall of Credit Transfer Dataset' above). As a consequence, the following apply:

- Index 4.3 'Cancellation Identification' can only be populated with AT-R072 'The specific reference of the Originator PSP for the Request for Recall by the Originator'.
- Index 4.19 'Originator' can only be populated with AT-P001 'The name of the Originator'.
- Index 4.20 'Reason' is to be populated with AT-R071 'Reason code for the Request for Recall by the Originator'.
- Index 4.21 'Code' can only be populated with ISO codes "AC03" (Wrong IBAN), "AM09" (Wrong Amount) and "CUST" (Requested By Customer).
- Index 4.23 'Additional Information' is to be populated with AT-R073 'Additional Information to AT-R071 Reason code for the Request for Recall by the Originator' which can be used in accordance with above reason codes.

The message can also be used for a Request for Recall by the Originator of a Credit Transfer with Extended Remittance Information (ERI, please refer to section 'Inter-PSP payment with use of the Extended Remittance Information option' below) whereby only AT-T010 'The unstructured Remittance Information sent by the Originator to the Beneficiary in the Credit Transfer Instruction' will be forwarded.

The message caters for single or group cancellation requests.

**Note:** The use case of the message is implied by the 'Message Name', 'camt.056.001.08', the 'Original Message Name Identification' must begin with pacs.008 (the addition of a variant number and version number is optional), 'Originator' set to AT-P001 'The name of the Originator' and 'Reason' set to "AC03", "AM09" or 'CUST' (under 'Code').

**Note:** Message elements under 'Original Transaction Reference' sequence are based on DS-02 attributes.

**Note:** Only one Request for Recall by the Originator can be sent for a given SCT Transaction. The Originator PSP is not allowed to send another Request for Recall by the Originator for the same initial SCT Transaction

	1..1	FITo FIPayment Cancellation Request V08	<b>ISO Name</b> <b>ISO Definition</b>	FITo FIPayment Cancellation Request V08 Scope The FIToFIPaymentCancellationRequest message is sent by a case creator/case assigner to a case assignee. This message is used to request the cancellation of an original payment instruction. The FIToFIPaymentCancellationRequest message is exchanged between the instructing agent and the instructed agent to request the cancellation of an interbank payment message previously sent (such as FIToFICustomerCreditTransfer, FIToFICustomerDirectDebit or FinancialInstitutionCreditTransfer).  The FIToFIPaymentCancellationRequest message supports both the request for cancellation (the instructed agent - or assignee - has not yet processed and forwarded the payment instruction) as well as the request for refund (payment has been fully processed already by the instructed agent - or assignee).

## 2.9 Inter-PSP Negative Response to the Request for Recall by the Originator Dataset (DS-08)

### 2.9.1 Use of Resolution of Investigation (camt.029.001.09)

In the context of a Request for Recall by the Originator of an SCT, this message is used to transmit a negative response to a:

- Request for Recall by the Originator message (FI-to-FI Payment Cancellation Request V01, camt.056.001.08);
- Request for Status Update on a Request for Recall by the Originator message (FI-to-FI Payment Status Request, pacs.028.001.03, refer to section 'Request for Status Update on a Request for Recall by the Originator' below);

where the following apply:

- Index 3.0 'Status': only sub-element 'Confirmation' can be used, populated with "RJCR" (Rejected Cancellation Request).
- Index 4.21 'Additional Information':
  - A mandatory occurrence starting with "ATR072/" followed by the information as per attribute description 'The specific reference of the Originator PSP for the Request for Recall by the Originator'.
  - In addition, when reason code was "AC03" (Wrong IBAN) in the camt.056, up to ten occurrences are allowed all starting with "ATR078/" followed by the information as per attribute description 'Provision of all information available to file a legal claim to recover the funds in case of reason code 'wrong unique identifier of the Beneficiary account' (optional)'.
  - As a consequence, the 'SEPA Mult.' is set to [1..11].

The message caters for a single or a group negative response.

**Note:** The use case of the message is implied by the 'Message Name', 'camt.029.001.09', the 'Original Message Name Identification' must begin with pacs.008 (the addition of a variant number and version number is optional) and 'Status' set to "RJCR".

**Note:** Message elements under 'Original Transaction Reference' sequence are based on DS-02 attributes.

## 2.10 Inter-PSP Positive Response to the Request for Recall by the Originator Dataset (DS-08)

### 2.10.1 Use of inter-PSP return credit transfer message (pacs.004.001.09)

In the context of a Request for Recall by the Originator of an SCT, this message is used to transmit a positive response to a:

- Request for Recall by the Originator message (FI-to-FI Payment Cancellation Request V01, camt.056.001.08);
- Request for Status Update on a Request for Recall by the Originator message (FI-to-FI Payment Status Request, pacs.028.001.03, refer to section 'Request for Status Update on a Request for Recall by the Originator' below);

where the following apply:

- Index 1.9 'Interbank Settlement Date' to be populated with AT-R076 'The settlement date for the positive response to the Request for Recall by the Originator'.
- Index 3.13 'Returned Interbank Settlement Amount' to be populated with AT-R074 'The returned amount of the positive response to the Request for Recall by the Originator'.
- Index 3.17 'Returned Instructed Amount' may be used.
- Index 3.22 'Amount' (under 'Charges Information') to be populated with AT-R075 'Fee for the positive response to the Request for Recall by the Originator', if any.
- Index 3.24 'Financial Institution Identification' (under 'Agent' under 'Charges Information') to be populated with AT-C002 'The BIC code of the Beneficiary PSP'.
- Index 3.31 'Originator' to be populated with AT-R002 'The Identification of the type of party initiating the "R" message'.
- Index 3.33 'Reason/Code' (under 'Return Reason Information') to be populated only with "FOCR" (Following Cancellation Request).
- Index 3.35 'Additional Information' (under 'Return Reason Information') to be used with a mandatory occurrence starting with "ATR072/" followed by the information as per attribute description 'The specific reference of the Originator PSP for the Request for Recall by the Originator'.

The message caters for a single or a group positive response.

**Note:** Attribute AT-R001 'The type of R-message' is implied by the 'Message Name', 'pacs.004.001.09', the 'Original Message Name Identification' must begin with pacs.008 (the addition of a variant number and version number is optional), 'Reason' under 'Return Reason Information' set to "FOCR" and Originator set to AT-E001 'Name of the Beneficiary'.

**Note:** Message elements under 'Original Transaction Reference' sequence are based on DS-02 attributes.

## 2.11 Request for Status Update on a Request for Recall by the Originator

### 2.11.1 Use of FI To FI Payment Status Request (pacs.028.001.03)

This message is sent to the Beneficiary PSP in case the Originator PSP did not receive a response to a Request for Recall by the Originator, where the following applies:

- Index 3.3 'Original Instruction Identification' must be populated with the 'Cancellation Identification' (AT-R072) of the related camt.056 transaction information.

In an SCT context, the message caters for a single or group status request.

**Note:** The use case of the message is implied by the 'Message Name', 'pacs.028.001.03', the 'Original Message Name Identification' must begin with camt.056 (the addition of a variant number and version number is optional) and the population of index 3.3 'Original Instruction Identification'.

**Note:** Message elements under 'Original Transaction Reference' are based on DS-02 attributes.

## 2.12 Inter-PSP SCT Inquiry Dataset (DS-09) for Claim Non-Receipt

### 2.12.1 Use of Claim Non-Receipt (camt.027.001.07)

This message is used to transport the Claim Non-Receipt from the Originator PSP to the Beneficiary PSP, directly or through intermediaries.

The message caters also for Claim Non-Receipt inquiries of SEPA Credit Transfers with Extended Remittance Information (ERI, please refer to section 'Inter-PSP payment with use of the Extended Remittance Information option' below) whereby only AT-T010 'The unstructured Remittance Information sent by the Originator to the Beneficiary in the SEPA Credit Transfer Instruction' will be forwarded.

The message caters for a single claim only.

**Note:** Attribute AT-Q001 'SCT inquiry reason code' is implied by the 'Message Name', 'camt.027.001.07' and the Original Message Name Identification must begin with pacs.008 (the addition of a variant number and version number is optional).

**Note:** Message elements under 'Original Transaction Reference' sequence are based on DS-02 attributes.

## 2.13 Inter-PSP Negative Response to Claim Non-Receipt (DS-10)

### 2.13.1 Use of Resolution of Investigation (camt.029.001.09)

This message is used to transmit a negative response to a:

- Claim Non-Receipt message (Claim Non-Receipt, camt.027.001.07);
- Request for Status Update on a Claim Non-Receipt message (FI-to-FI Payment Status Request, pacs.028.001.03, refer to section 'Request for Status Update on a SCT Inquiry' below);

where the following apply:

- Index 3.0 'Status': only sub-element 'Confirmation' is allowed, populated with "RJNR" (Rejected Claim Non Receipt) only.
- Under index 6.0 'Claim Non Receipt Details', only index 6.2 'Rejected' is allowed, populated with "NOOR" (No Original Transaction Received), "RNPR" (Original Transaction Received but Not Processable), "ARJT" (Already Rejected Transaction), "ARDT" (Already Returned Transaction) or "RR04" (Regulatory Reason).

In the context of a Claim Non-Receipt, the message caters for a single response only.

**Note:** The use case of the message is implied by the 'Message Name', 'camt.029.001.09', the 'Original Message Name Identification' must begin with pacs.008 (the addition of a variant number and version number is optional) and 'Status' set to "RJNR" (Rejected Claim Non-Receipt).

**Note:** A negative response implies that a Claim Non-Receipt is rejected by the receiving party. Also, please refer to the description in the message below under the 'Claim Non-Receipt Details' block.

## 2.14 Inter-PSP Positive Response to Claim Non-Receipt (DS-10)

### 2.14.1 Use of Resolution of Investigation (camt.029.001.09)

This message is used to transmit a positive response to a:

- Claim Non-Receipt message (Claim Non-Receipt, camt.027.001.07);
- Request for Status Update on a Claim Non-Receipt message (FI-to-FI Payment Status Request, pacs.028.001.03, refer to section 'Request for Status Update on a SCT Inquiry' below);

where the following apply:

- Index 3.0 'Status': only sub-element 'Confirmation' is allowed, populated with "ACNR" (Accepted Claim Non Receipt) only.
- Under index 6.0 'Claim Non Receipt Details', only index 6.1 'Accepted' and the relevant sub-elements are allowed.
- Under index 9.0 'Resolution Related Information', only 9.8 'Charges' and relevant sub-elements are allowed to accommodate AT-Q007 'Fee for handling the SCT Inquiry'.

In the context of a Claim Non-Receipt, the message caters for a single response only.

**Note:** The use case of the message is implied by the 'Message Name', 'camt.029.001.09', the 'Original Message Name Identification' must begin with pacs.008 (the addition of a variant number and version number is optional) and 'Status' set to "ACNR".

**Note:** Message elements under 'Original Transaction Reference' sequence are based on DS-02 attributes.

**Note:** A positive response implies that a Claim Non-Receipt is accepted by the receiving party.

**Note:** The payment of the charges is to be effectuated according to the current inter-PSP practices related to such matters. It is recommended to use the pacs.008 as described for this specific usage as per below section 'Inter-PSP Fee and/or Compensation Payment'. When paying the charges, the Originator PSP must provide 'AT-Q002 The specific SCT inquiry reference of the Participant initiating the SCT inquiry' and 'AT-Q009 Reference of the Beneficiary Bank for interbank fee and/or compensation payment' in order to allow the Beneficiary PSP to allocate the payment to the right case. Moreover, the IBAN provided under 'Resolution Related Information/Charges' is the one corresponding to AT-Q008 'The IBAN of the account to be credited at the Beneficiary PSP' in the inter-PSP payment message.

## **2.15 Inter-PSP SCT Inquiry Dataset (DS-09) for Claim for Value Date Correction**

### **2.15.1 Use of Request to Modify Payment (camt.087.001.06)**

This message is used to transport the Claim for Value Date Correction from the Originator PSP to the Beneficiary PSP, directly or through intermediaries.

The message caters for a single claim.

**Note:** Attribute AT-Q001 'SCT inquiry reason code' is implied by the 'Message Name', 'camt.087.001.06' and the 'Original Message Name Identification' must begin with pacs.008 (the addition of a variant number and version number is optional).

**Note:** Message elements under 'Original Transaction Reference' sequence are based on DS-02 attributes.

## 2.16 Inter-PSP Negative Response to Claim for Value Date Correction (DS-10)

### 2.16.1 Use of Resolution of Investigation (camt.029.001.09)

This message is used to transmit a negative response to a:

- Claim for Value Date Correction message (Request To Modify Payment, camt.087.001.06);
- Request for Status Update on a Claim for Value Date Correction message (FI-to-FI Payment Status Request, pacs.028.001.03, refer to section 'Request for Status Update on a SCT Inquiry' below);

where the following applies:

- Index 3.0 'Status': only sub-element 'Confirmation' is allowed, populated with "RJVA" (Rejected Value date Adjustment) or "CVAA" (Correct Value date Already Applied).

In the context of a Claim for Value Date Correction, the message caters for a single response only.

**Note:** The use case of the message is implied by the 'Message Name', 'camt.029.001.09', the 'Original Message Name Identification' must begin with pacs.008 (the addition of a variant number and version number is optional) and 'Status' set to either "RJVA" or "CVAA".

**Note:** Message elements under 'Original Transaction Reference' sequence are based on DS-02 attributes.

**Note:** A negative response implies that a Claim for Value Date Correction is rejected by the receiving party.

## 2.17 Inter-PSP Positive Response to Claim for Value Date Correction (DS-10) with request for inter-PSP fee and/or interest compensation

### 2.17.1 Use of Resolution of Investigation (camt.029.001.09)

This message is used to transmit a positive response to a:

- Claim for Value Date Correction message (Request To Modify Payment, camt.087.001.06);
- Request for Status Update on a Claim for Value Date Correction message (FI-to-FI Payment Status Request, pacs.028.001.03, refer to section 'Request for Status Update on a SCT Inquiry' below);

by requesting payment of inter-PSP fee and/or interest compensation before applying the value date correction (as per Rulebook requirement 'the Beneficiary PSP has the right to receive interest compensation and/or a fee from the Originator PSP'), where the following apply:

- Index 3.0 'Status': only sub-element 'Confirmation' is allowed, populated with "ACVA" (Accepted Value Date Adjustment) only.
- Under index 9.0 'Resolution Related Information', only following elements are allowed:
  - Index 9.5 'Interbank Settlement Date' to accommodate AT-Q005 'New value date of the credit transfer based on the new settlement date';
  - Index 9.7 'Compensation' and relevant sub-elements to accommodate AT-Q006 'The interest compensation recovered by the Beneficiary PSP from the Originator PSP';
  - Index 9.22 'Compensation/Reason', only "VADA" (Value Date Adjustment) is allowed;
  - Index 9.23 'Charges' and relevant sub-elements to accommodate AT-Q007 'Fee for handling the SCT Inquiry'.

In the context of a Claim for Value Date Correction, the message caters for a single response only.

**Note:** The use case of the message is implied by the 'Message Name', 'camt.029.001.09', the 'Original Message Name Identification' must begin with pacs.008 (the addition of a variant number and version number is optional) and 'Status' set to "ACVA".

**Note:** Message elements under 'Original Transaction Reference' sequence are based on DS-02 attributes.

**Important note:** When payment of inter-PSP fee and/or interest compensation is requested by the Beneficiary PSP, the value date adjustment will be applied by the Beneficiary PSP only after its payment.

After having taken notice of the payment of the inter-PSP fee and/or interest compensation, **the Beneficiary PSP will send a confirmation message to the Originator PSP** in order to confirm the application of the value date adjustment, please refer to the section 'Inter-PSP Confirmed Positive Response to Claim for Value Date Correction' below.

If compensation and/or charges are claimed in the present response then no compensation and/or charges can be claimed in the Confirmed Positive Response (see section 2.18.1).

The payment of the inter-PSP fee and/or interest compensation is to be effectuated according to the current inter-PSP practices related to such matters. It is recommended\* to use the DS-11 pacs.008 (i.e. at least the DS-11 'Credit Transfer Transaction Information' block in case of a DS-02/DS-11 mix) as described for this specific usage as per below section 'Inter-PSP Fee and/or Compensation Payment'. When paying the inter-PSP fee and/or interest compensation, the Originator PSP must provide 'AT-Q002 The specific SCT inquiry reference of the Participant initiating the SCT inquiry' and 'AT-Q009 Reference of the Beneficiary PSP for inter-PSP fee and/or compensation payment' to allocate the payment to the right case. Moreover, the IBAN provided under 'Resolution Related Information/Compensation' or 'Resolution Related Information/Charges' is the one corresponding to AT-Q008 'The IBAN of the account to be credited at the Beneficiary PSP' in the inter-PSP payment message.

The rulebook stipulates that "The Beneficiary PSP must provide a Response-to-SCT-inquiry message about the concerned SCT inquiry within 10 Banking Business Days after it has received the SCT inquiry message" (for further information please see section 4.4.2 of the SCT Rulebook).

In case of a first positive response (camt.029) requesting payment of an inter-PSP fee and/or interest compensation and followed by a second one to confirm, please note that the above timeframe only applies to the first response, which reflects the position of the Beneficiary PSP. This in view of the fact that the aim of the SCT inquiry is to get information about the concrete fate of the original SCT transaction, i.e. has the Beneficiary PSP applied the correct value date. The payment of the inter-PSP fee and/or interest compensation and consequently the confirmed positive response are not included in this timeframe. However, these should be done as soon as possible to reduce further friction for the Originator and the Beneficiary.

\* Clarification of the word "recommended":

SCT scheme participants may agree (e.g. on a bilateral or community/country basis) to use another practice outside the SCT scheme to settle such payments. But to ensure a minimal standard at SEPA level, all scheme participants must implement the DS-11 pacs.008 message (i.e. at least the DS-11 'Credit Transfer Transaction Information' block in case of a DS-02/DS-11 mix) as described in section 2.19 of the SCT IGs.

## 2.18 Inter-PSP Confirmed Positive Response to Claim for Value Date Correction (DS-10)

### 2.18.1 Use of Resolution of Investigation (camt.029.001.09)

This message is used to send a confirmed positive response to a:

- Claim for Value Date Correction message (Request To Modify Payment, camt.087.001.06);
- Request for Status Update on a Claim for Value Date Correction message (FI-to-FI Payment Status Request, pacs.028.001.03, refer to section 'Request for Status Update on a SCT Inquiry' below);

for which either

- Neither an inter-PSP fee nor interest compensation is requested by the Beneficiary PSP, or
- An inter-PSP fee and/or interest compensation has already been received by the Beneficiary PSP following an "ACVA" (Accepted Value Date Adjustment) positive response (refer to former section 'Inter-PSP Positive Response to Claim for Value Date Correction (DS-10) with request for interest compensation'), or
- Interest compensation cannot be requested because the calculation results in a negative amount but the Beneficiary PSP asks for charges to be paid after the already applied value date correction, or
- The Beneficiary PSP asks for inter-PSP fee and/or interest compensation to be paid after the already applied value date correction,

where the following apply:

- Index 3.0 'Status': only sub-element 'Confirmation' is allowed, populated with "MODI" (Modified As Per Request) only.
- Under index 9.0 'Resolution Related Information', only following elements are allowed:
  - Index 9.5 'Interbank Settlement Date' to accommodate AT-Q005 'New value date of the credit transfer based on the new settlement date';
  - If inter-PSP fee and/or interest compensation is to be paid **after application of the value date correction**, then the following must be used:
    - Index 9.7 'Compensation' and relevant sub-elements to accommodate AT-Q006 'The interest compensation recovered by the Beneficiary PSP from the Originator PSP'
    - Index 9.22 'Compensation/Reason', only "VADA" (Value Date Adjustment)
    - Index 9.25 'Charges' and relevant sub-elements to accommodate AT-Q007 'Fee for handling the SCT Inquiry'

In the context of a Claim for Value Date Correction, the message caters for a single response only.

**Note:** The use case of the message is implied by the 'Message Name', 'camt.029.001.09', the 'Original Message Name Identification' must begin with pacs.008 (the addition of a variant number and version number is optional) and 'Status' set to "MODI".

**Note:** Message elements under 'Original Transaction Reference' sequence are based on DS-02 attributes.

**Important Note:**

If compensation and/or charges are claimed in the Positive Response (see section 2.17) then no compensation and/or charges can be claimed in the present response message.

The payment of the inter-PSP fee and/or interest compensation is to be effectuated according to the current inter-PSP practices related to such matters. It is recommended\* to use the DS-11 pacs.008 (i.e. at least the DS-11 'Credit Transfer Transaction Information' block in case of a DS-02/DS-11 mix) as described for this specific usage as per below section 'Inter-PSP Fee and/or Compensation Payment'. When paying the interest compensation and, if applicable charges, the Originator PSP must provide AT-Q002 'The specific SCT inquiry reference of the Participant initiating the SCT inquiry' and AT-Q009 'Reference of the Beneficiary PSP for inter-PSP fee and/or compensation payment' in order to allow the Beneficiary PSP to allocate the payment to the right case. Moreover, the IBAN provided under 'Resolution Related Information/Compensation' or 'Resolution Related Information/Charges' is the one corresponding to AT-Q008 'The IBAN of the account to be credited at the Beneficiary PSP' in the inter-PSP payment message.

The rulebook stipulates that "The Beneficiary PSP must provide a response-to-SCT-inquiry message about the concerned SCT inquiry within 10 Banking Business Days after it has received the SCT inquiry message" (for further information please see section 4.4.2 of the SCT Rulebook).

In case of a first positive response (camt.029) requesting payment of an inter-PSP fee and/or interest compensation and followed by a second one to confirm, please note that the above timeframe only applies to the first response, which reflects the position of the Beneficiary PSP. This in view of the fact that the aim of the SCT inquiry is to get information about the concrete fate of the original SCT transaction, i.e. has the Beneficiary PSP applied the correct value date. The payment of the inter-PSP fee and/or interest compensation and consequently the confirmed positive response are not included in this timeframe. However, these should be done as soon as possible to reduce further friction for the Originator and the Beneficiary.

\* Clarification of the word "recommended":

SCT scheme participants may agree (e.g., on a bilateral or community/country basis) to use another practice outside the SCT scheme to settle such payments. But to ensure a minimal standard at SEPA level, all scheme participants must implement the DS-11 pacs.008 message (i.e. at least the DS-11 'Credit Transfer Transaction Information' block in case of a DS-02/DS-11 mix) as described in section 2.19 of the SCT IGs.

## 2.19 Inter-PSP Fee and/or Compensation Payment Dataset (DS-11)

### 2.19.1 Use of FI to FI Customer Credit Transfer (pacs.008.001.08)

The message is used to transport the instruction related to the payment of:

- An inter-PSP fee for handling the SCT inquiry in case of a positive response to an SCT inquiry for the reasons 'Claim of Non-Receipt' and 'Claim for Value Date Correction', and/or
- Interest compensation resulting from a positive response to an SCT inquiry for the reason 'Claim for Value Date Correction'.

The message caters for the settlement of SCT inquiry fees and/or interest compensation payments for a single SCT inquiry case or multiple SCT inquiry cases.

**Note:** The use case of the message is implied by the 'Name', 'pacs.008.001.08', with 'Category Purpose' set to "FCOL" (Fee Collection), "INTE" (Interest) or "FCIN" (Fee Collection and Interest).

**Note:** The Beneficiary PSP may wish that the SCT inquiry fee and interest compensation relating to the same inquiry are paid in two separate payments or together in one payment.

**Note:** It is allowed to send a mix of DS-02 and DS-11 transactions, i.e. one pacs.008.001.08 message can contain 'Credit Transfer Transaction Information' blocks as per DS-02 (Inter-PSP Payment Dataset, refer to section 2.1) and DS-11 (the present section). In such case:

- 'Group Header' must be formatted in accordance with DS-02 requirements (refer to section 2.1),
- 'Payment Type Information' must be present only in 'Credit Transfer Transaction Information' in order to allow mentioning under 'Category Purpose' the codes necessary under the present section,
- 'Credit Transfer Transaction Information' block(s) relating to DS-11 must be formatted as per this section 2.19.

**Note:** The present section only describes the transactions as per DS-11, i.e. the Inter-PSP Fee and/or Compensation Payment Dataset.

## 2.20 Request for Status Update on a SCT Inquiry

### 2.20.1 Use of FI To FI Payment Status Request (pacs.028.001.03)

A pacs.028.001.03 message can be sent to the Beneficiary PSP in case the Originator PSP did not receive a response to an SCT Inquiry (i.e. Claim Non-Receipt or Claim for Value Date Correction). In this context, the following applies:

- Index 3.6 'Original Instruction Identification' must be populated with the case ID (AT-Q002) of the related camt.027/camt.087.

In an SCT context, the message is used for a single or group status request.

**Note:** Attribute AT-Q001 'SCT inquiry reason code' is implied by the 'Message Name' set to 'pacs.028.001.03' and the 'Original Message Name Identification' must begin with 'camt.027' or 'camt.087' (the addition of a variant number and version number is optional).

**Note:** Message elements under 'Original Transaction Reference' are based on DS-02 attributes.

## 2.21 Inter-PSP payment with use of the Extended Remittance Information option

Annex V 'Extended Remittance Information' (ERI) to the SCT Rulebook (document EPC 152-18) describes this optional feature of the SCT scheme that can only be used between PSPs which have adhered to the option.

The ERI Option supports the transmission of one occurrence of 140 characters of Unstructured Remittance Information (AT-T010) and up to 999 occurrences of Structured Remittance Information (AT-T011) within a single SEPA Credit Transfer Instruction to allow the swift settlement of several payment obligations for the Originator.

### 2.21.1 Use of FI to FI Customer Credit Transfer (pacs.008.001.08)

For making use of the ERI option, AT-T010 'The unstructured Remittance Information sent by the Originator to the Beneficiary in the Credit Transfer Instruction' and AT-T011 'The structured Remittance Information sent by the Originator to the Beneficiary in the Credit Transfer Instruction' of the Annex V have to be used under index 2.137 'Remittance Information' of the FI to FI Customer Credit Transfer (pacs.008.001.08) and the transactions have to be tagged "PERI" (Payment with Extended Remittance Information) in the 'Local Instrument' data element.

The message caters for bulk and single payment instructions.

**Important note:** Each of the structured occurrences must be limited to 280 characters between (and excluding) the <Strd> and </Strd> tags but including the opening and closing tags of the sub-elements. It is the duty of the system producing the Extended Remittance Information to manage and check the compliance of each occurrence with the 280 characters rule. If the description of one given document (e.g. an invoice) requires more than 280 characters, a second occurrence (or more) can be used, bearing the same invoice number as the first one.

**Note:** The Originator PSP must verify upfront if the Beneficiary PSP is an ERI Option Participant or not. The Originator PSP sends SEPA Credit Transfer Transactions containing ERI only to those Beneficiary PSPs that are ERI Option Participants.

**Note:** In case there is no arrangement for the concrete delivery and presentation of ERI between the Beneficiary PSP and the Beneficiary, the Beneficiary PSP must deliver only the received occurrence of 140 characters of unstructured Remittance Information in full and without alteration to the Beneficiary.

**Note:** The combination of ERI and non-ERI transactions in the same message is not allowed. It should be left to the Originator PSP to agree with the CSM, that the Originator PSP may send ERI and non-ERI transactions in the same message, even though the CSM would separate the ERI and non-ERI transactions to the Beneficiary PSP via different messages. This combination of ERI and non-ERI transactions is not reflected in the message description below.

### **3 LIST OF CHANGES IN THE CREDIT TRANSFER INTER-PSP IMPLEMENTATION GUIDELINES - RELATIVE TO 2023 V1.1**

**Note: This list is for informational purposes only. The changes included in the body of the document are the ones in effect and also encompass those resulting from errata document EPC050-23.**

#### **SYMBOLS USED**

1. Column one contains the identification number of the Change
2. Column two contains the reference(s) to the relevant Index Number
3. Column three contains the reference(s) to the relevant section or message element (including full path)
4. Column four contains a description of the change
5. Column five contains the type of change:
  - TYPO: Typing and layout errors
  - CLAR: Clarification of the text
  - CHAN: Change in or further alignment with the Rulebook content

<b>N°</b>	<b>#</b>	<b>Section / Message Element</b>	<b>Description</b>	<b>Type</b>
1.		0.1 References	Inclusion of following references: - EPC153-22 EPC Guidance Document: Provision of Addresses under the EPC Payment Schemes - EPC088-22 EPC Guidance Document – Improve Transparency for Retail Payment End-Users	CHAN
2.		1 Introduction	Inclusion of “Request for Status Update on a Request for Recall (step CT-02.07 under 4.3.2.3)” in column Rulebook related to pacs.028 message	CLAR
3.		1.7 Change over date	Inclusion of note: As of 22 November 2026, only the use of structured and hybrid addresses will be allowed (i.e. the provision of unstructured addresses is no longer allowed as from this date). For further details, please see EPC Guidance Document “Provision of Addresses under the EPC Payment Schemes” [10].	CHAN
