Important update

As of 15 November 2026, the unstructured address format can no longer be provided in EPC payment messages.

In this document, every reference to 22 November 2026 is no longer valid and has to be read as 15 November 2026.

SEPA Direct Debit Business-to Business Scheme

Inter-PSP Implementation Guidelines

EPC301-07 / 2025 Version 1.0 / Date issued: 28 November 2024 / Date effective: 5 October 2025

Public

Abstract

This document sets out the rules for implementing Version 1.1 of the 2025 SEPA Direct Debit Business-to-Business Scheme Rulebook, based on the 2019 message version of the ISO 20022 standard.

0.3 Purpose of Document

The objective of these Guidelines is to define the rules to be applied to the inter-Payment Service Provider (PSP) ISO 20022 XML message standards for the implementation of the SEPA B2B Direct Debits as defined in the SEPA Direct Debit B2B Scheme Rulebook.

Note: The term “bank” has been replaced by “PSP” in all the EPC SEPA payment scheme rulebooks and associated implementation guidelines to formally reflect the changes introduced by the Payment Services Directive (PSD) to the categories of institutions that can offer payment services, and the variety in PSP categories that are eligible to adhere to the EPC SEPA payment schemes. However, please note that in the context of ISO, the term “bank” is still used.

Note: The term ‘Customer’ is to be understood as ‘Payment Service User’ (PSU), meaning a natural or legal person making use of a payment service in the capacity of payer, payee, or both. Such person can take up the role of Creditor and/or Debtor under the Scheme.

1 INTRODUCTION

This document sets out the SEPA rules for implementing the inter-PSP direct debit ISO 20022 XML message standards. The SEPA B2B Direct Debit Scheme (B2B Scheme) Rulebook defines nine data sets which are implemented in the relevant ISO 20022 XML message standard as follows.

SEPA Direct Debit Scheme Rulebook	ISO 20022 XML Message Standards
DS-01 <i>The Mandate</i>	Not applicable as this refers to the paper mandate
DS-02 <i>The dematerialised Mandate</i>	For electronic Mandates see the B2B e-Mandate Service Implementation Guidelines.
DS-04 <i>The inter-PSP Collection</i>	FI to FI Customer Direct Debit (pacs.003.001.08)
DS-05 <i>Direct Debit Rejection, Return of a Collection or a Reversal</i>	Return – Payment Return (pacs.004.001.09) Reject – Payment Status Report (pacs.002.001.10)
DS-06 <i>PSP-to-Business Customer direct debit information</i>	Statements/advice ISO 20022 XML standards are covered separately.
DS-07 <i>The inter-PSP Reversal for a Collection by the Creditor</i>	Reversal –Payment Reversal (pacs.007.001.09)
DS-08 <i>The request and response message for the inquiry procedure</i>	Not applicable as there is no specific XML message available
DS-09 <i>The request and response template for the inquiry procedure</i>	Not applicable as this refers to a paper-based exchange
DS-10 <i>The request message for obtaining a copy of a Mandate</i>	Not applicable as there is no specific XML message available yet
DS-11 <i>The template for the request and the response for obtaining a copy of a Mandate</i>	Not applicable as this refers to a paper-based exchange

The Guidelines for the inter-PSP direct debit message standards are mandatory when using the SEPA B2B Direct Debit Scheme.

1.1 Coverage of the SEPA Business-to-Business Direct Debit Implementation Guidelines

The purpose of the SEPA inter-PSP Implementation Guidelines, hereafter referred to as the Guidelines, is to provide guidance on the use of the Global ISO 20022 XML standards in making SEPA B2B Direct Debit payments as defined in the SEPA Direct Debit B2B Scheme Rulebook and supplemented by processing requirements.

The Guidelines are fully aligned to the SEPA Direct Debit B2B requirements as defined in the Rulebook and identify message elements needed for inter-PSP processing while recognising message elements that may be available for use in Additional Optional Services (AOS), as shown below.

Global ISO 20022 XML Message Standards			
Message elements from the ISO messages corresponding to Rulebook requirements	Message elements that are mandatory in the ISO messages or needed for Inter-PSP Processing	Message elements from the ISO messages available for use by AOS within an EPC Governance framework	Message elements from ISO messages not applicable to SEPA
EPC Implementation Guidelines for SEPA B2B subset, identifying elements <ul style="list-style-type: none"> - to be used as defined in ISO - to be used with SEPA usage rules (from or completing the Rulebook) Note: yellow fields can be used in a specific way for an AOS.		To be developed and documented by AOS Communities	Not available for use in SEPA e-Mandate Service
SEPA B2B Direct Debit Payments			

Figure 1

These Guidelines define the SEPA B2B Direct Debit Mandatory Subset² of the Global ISO 20022 XML standard that consists of message elements:

- required in the Rulebook as business requirements
- needed for processing by PSPs and clearing and settlement mechanisms

These message elements define the **SEPA Direct Debit B2B service** and are denoted by yellow shading in the message structures given in the following chapters. Only these elements are further detailed with relevant SEPA Direct Debit B2B requirements, such as the use of the message element, its components or the values that must be used. Usage rules, for example, may indicate limits on the number of repetitions, or code value restrictions, while format rules may be used to indicate the allowable combinations of components of a message element.

These Guidelines also recognise message elements and the usage rules in the ISO 20022 XML standard that may be available for use in an AOS, subject to a governance framework to be defined by the EPC. The definition and documentation of these message elements are a matter for the AOS communities involved. These message elements are denoted by white shading.

² The SEPA Direct Debit Business-to-Business Mandatory subset is hereafter known as the SEPA Direct Debit Business-to-Business service.

Where there are message elements that do not apply to SEPA payments, these are denoted with red shading in the right-most column of the message structures. To date, few such message elements have been identified.

1.2 Use of these Guidelines by the instructing and instructed parties³

- SEPA Direct Debit B2B payments are executed using messages only containing message elements defined as part of the SEPA Direct Debit B2B Mandatory Subset (shaded yellow in Figure 2).
- Payments that include message elements that are defined and documented by AOS communities (shaded white/yellow in Figure 2) are considered as SEPA payments, but not as SEPA Direct Debit B2B payments.
- It is the responsibility of the instructing PSP of the message to ensure that message elements defined for use in an AOS are only included in messages sent to AOS community members.
- The instructed PSP receiving a message containing AOS-related message elements, but which is not a member of the AOS community, may ignore the information, that is, not use it for processing, nor forward it to the next party in the chain. The instructed PSP, however, may reject the message for this reason.

1.3 Notation Conventions

The Guidelines are presented in a similar format than the one used in the ISO 20022 XML standard.

#	SEPA Mult	Message Element	SEPA Core Requirements
1.00	1..1	Message root +Group Header ++Sublevel 1 +++Sublevel 2	<i>SEPA Usage Rule(s)</i> (e.g. Mandatory) <i>SEPA Format Rule(s)</i> ISO Name ISO Definition XML Tag Type (Yellow: Message Element that is part of the SEPA Core Service)
	1..1		XML Tag xs:choice
1.01	1..1	Message root +Group Header ++Sublevel 1 +++Sublevel 2 ++++Sublevel 3	<i>SEPA Rulebook</i> (Attribute used in Rulebook) <i>SEPA Usage Rule(s)</i> (e.g. Only 'SEPA' is allowed.) ISO Name ISO Definition XML Tag Type ISO Length SEPA Length (Yellow: Message Element that is part of the SEPA Core Service)
			SEPA Code restrictions

³ Instructing and instructed parties include CSMs.

			SEPA <i>SingleEuroPaymentsArea</i> <i>Payment must be executed following the Single Euro Payments Area scheme.</i>
1.02	1..1	Message root +Group Header ++Sublevel 1 +++Sublevel 2 ++++Sublevel 3	ISO Name ISO Definition XML Tag Type (White: Message Element that is not part of the Core Service but is available for use in a SEPA AOS)
1.0n	0..1	Message root +Group Header ++Sublevel 1	ISO Name ISO Definition XML Tag Type (Red: Message Element that is not to be used in SEPA Payments)

Figure 2

Where:

- Column 1 indicates the message element Index number specific to these Implementation Guidelines.

Components of message elements that are not allowed in SEPA payments or where no SEPA requirements are defined are not displayed in full as the ISO 20022 XML standard applies.

- Column 2 indicates the mandatory or optional status and the number of repetitions defined by the SEPA Core Requirements, e.g.:
 - 0..1 element is optional and may only be present once
 - 0..n element is optional with unlimited repetition
 - 1..1 element is mandatory and must be present exactly once
 - 1..n element is mandatory with unlimited repetition

The displayed SEPA multiplicity may thus differ from the one of the ISO 20022 XML standard. When an element is shaded yellow, possible remaining ISO 20022 occurrences are available for use in an AOS.

Empty elements are not allowed (i.e. a message shall not contain elements without content).

- Column 3 indicates the full path of an element where the last line contains the name of the message element as defined in the ISO 20022 XML standard. When an element contains sub-elements these are indented to the right and noted with a plus sign (+) per level.
- Column 4 specifies in italic characters the SEPA Core Requirements as additional rules to those specified in the ISO 20022 XML standard, which are shown in non-italic characters.
 - When defined in the Rulebook, the attribute is indicated by the attribute name and where applicable, the number, i.e., AT-XXXX. Those message elements are shaded yellow.
 - When the message element relates to inter-PSP processing requirements, it is shaded yellow.
 - When the message element specified in the ISO 20022 XML standard is used for SEPA payments without change (regarding the definition and

any usage rules), no specific SEPA Core requirements are provided and is shaded yellow.

- When the message element is specified in the ISO 20022 XML standard as optional, but is mandatory in SEPA Core requirements, this is specified as 'Mandatory' and is shaded yellow.
- When the message element is not available for use in SEPA payments, this is indicated with red shading. Note that these message elements are similarly not available for use in an AOS.
- The SEPA length is indicated for every message element (if applicable), even if it is the same length as in the ISO 20022 XML standard.

Column 4 may also indicate conditional relations between message components or elements, e.g. either component 1 or component 2 must be present, component 1 and component 2 are mutually exclusive. For XML Tag "xs:choice" (containing just one subsequent component or element due to applied restrictions on subsequent components or elements) column 4 may indicate, that the "choice" nature is lost due to applied restrictions i.e. only one element is shaded yellow.

1.4 Character Set

The character set issue centres on the use of the full set of characters in the message elements. Two considerations are:

- While PSPs must be allowed to use the character set currently in use at national level,
- PSPs throughout SEPA cannot be required to support the full character set used in SEPA countries.

Therefore:

- The ISO 20022 XML messages allow for the full range of global language requirements (UTF-8)
- PSPs must be able to support the Latin character set commonly used in international communication, as follows:

a b c d e f g h i j k l m n o p q r s t u v w x y z

A B C D E F G H I J K L M N O P Q R S T U V W X Y Z

0 1 2 3 4 5 6 7 8 9

/ - ? : () . , ' +

Space

- References, identifications and identifiers must respect the following [10]:
 - Content is restricted to the Latin character set as defined above
 - Content must not start or end with a '/'
 - Content must not contain '//'

Note: When a slash is used as delimiter between the attribute number (AT-XXXX) or code (ABCD) and the data content, no space is allowed directly after this slash

However, there may be bilateral or multilateral agreements to support one or more sets of characters beyond the Latin character set referred to above.

1.5 General Message Element Specifications

1.5.1 BIC

The BIC used to identify financial institutions (Agents in the ISO 20022 XML standards) may be either BIC 11 or BIC 8.

1.5.2 Identifier of the Creditor (AT-E005)

The Creditor is identified in the scheme by an identifier as defined below. In these Guidelines, this identifier is indicated in the ISO 20022 data element 'Creditor Scheme Identification'. The creditor can be a legal entity, or an association that is not a legal entity, or a person.

This identifier must be stable over time, to enable the Debtor and the Debtor PSP to come back to the Creditor for Refunds and complaints, and to check the existence of a valid Mandate at the presentation of Collections by the Creditor.

The Creditor identifier has the attributes defined in the Rulebook under AT-E005.

This section also applies to AT-M003 'The identifier of the original Creditor who issued the Mandate'.

The data element is case and space insensitive.

Format Rule:

- Positions 1 and 2 contain the ISO country code
- Positions 3 and 4 contain the check digits
- Positions 5 to 7 contain the Creditor Business Code. When the Creditor Business Code is not used, then the value is set to 'ZZZ'. The Creditor Business Code cannot contain spaces.
- Positions 8 up to 35 contain the country-specific identifier
- Note: the calculation of the check digit requires the following preliminary steps:
 - Disregard positions 5 to 7
 - Take the country-specific part, positions 8 to 35, and delete all non-alphanumeric characters
 - Add the ISO country code and '00' to the right-hand end
 - Convert letters to digits in accordance with conversion table 1
 - Apply the check character system MOD 97-10 (see ISO 7064)

A = 10	G = 16	M = 22	S = 28	Y = 34
B = 11	H = 17	N = 23	T = 29	Z = 35
C = 12	I = 18	O = 24	U = 30	
D = 13	J = 19	P = 25	V = 31	
E = 14	K = 20	Q = 26	W = 32	
F = 15	L = 21	R = 27	X = 33	

Table 1

1.5.3 Mandate Identification (AT-M001 The Unique Mandate Reference)

This data element is case insensitive. For example: Mandate Identification 123AAa45678, 123aaA45678, 123aaa45678 and 123AAA45678 shall be considered identical.

1.6 Implementation of ISO 20022 XML rules

This document should be read in conjunction with the ISO 20022 XML message standards.

1.7 Change-Over Date

As from the change-over date, receiving PSPs may only receive messages, including the r-messages, in the new version.

Note: As of 22 November 2026, only the use of structured and hybrid addresses will be allowed (i.e. the provision of unstructured addresses is no longer allowed as from this date). For further details, please see EPC Guidance Document "Provision of Address under the EPC Payment Schemes" [11].

2 MANDATORY PSP-TO-PSP MESSAGES

2.1 Inter-PSP Collection (DS-04)

2.1.1 Use of the FI to FI Customer Direct Debit (pacs.003.001.08)

This message is used to transport the Direct Debit B2B Collection instruction from the Creditor PSP to the Debtor PSP, directly or through intermediaries.

The message caters for bulk and single direct debit instructions.

Note: The use case is implied by the name of the message 'pacs.003.001.08' and 'Local Instrument' under 'Payment Type Information' set to "B2B" (SEPA Direct Debit Business to Business).

2.2 Inter-PSP Direct Debit Return of a Collection (DS-05)

2.2.1 Use of the Payment Return (pacs.004.001.09)

The Payment Return is the message used to transport the B2B Direct Debit return instruction from the Debtor PSP to the Creditor PSP, directly or through intermediaries. The 'Return Originator' must contain a BIC, as this means that the message is being used as a Return.

This message caters for bulk and single direct debit return instructions.

This message caters for Interchange Fees in the return of a collection.

Note: Attribute AT-R001 'Type of "R" message' is implied by the 'Message Name', 'pacs.004.001.09', the 'Original Message Name Identification' must begin with 'pacs.003' (the addition of a variant number and version number is optional) and 'Local Instrument' under 'Payment Type Information' in 'Original Transaction Reference' set to "B2B" (SEPA Business to Business Direct Debit).

Note: Message elements under the 'Original Transaction Reference' sequence are based on DS-04 attributes.

Note: The mixing of different 'Local Instrument' values under 'Original Transaction Reference' is not allowed in the same message.

2.2.2 Message Element Specifications

The reasons for an inter-PSP **Return** specified in the Rulebook are mapped to the ISO codes as follows:

ISO Code	ISO Name	SEPA Reason as specified in the Rulebook
AC01	IncorrectAccountNumber	Account identifier incorrect (i.e. invalid IBAN)
AC04	ClosedAccountNumber	Account closed
AC06	BlockedAccount	Account blocked Account blocked for direct debit by the Debtor
AC13	InvalidDebtorAccountType	Debtor account is a consumer account
AG01	TransactionForbidden	Direct debit forbidden on this account for regulatory reasons
AG02	InvalidBankOperationCode	Operation code/transaction code/sequence type incorrect, invalid file format <i>Usage Rule:</i> To be used to indicate an incorrect 'operation code/transaction code/sequence type'
AM04	InsufficientFunds	Insufficient funds
AM05	Duplication	Duplicate collection
BE05	UnrecognisedInitiatingParty	Identifier of the Creditor Incorrect
MD01	NoMandate	No Mandate or unable to obtain mandate confirmation from the Debtor
MD07	EndCustomerDeceased	Debtor deceased
MS02	NotSpecifiedReasonCustomerGenerated	Refusal by the Debtor
MS03	NotSpecifiedReasonAgentGenerated	Reason not specified
RC01	BankIdentifierIncorrect	PSP identifier incorrect (i.e. invalid BIC)
RR01	MissingDebtorAccountOrIdentification	Regulatory Reason
RR02	MissingDebtorNameOrAddress	Regulatory Reason
RR03	MissingCreditorNameOrAddress	Regulatory Reason
RR04	RegulatoryReason	Regulatory Reason
SL01	SpecificServiceOfferedByDebtorAgent	Due to specific service offered by the Debtor PSP

2.3 Inter-PSP Direct Debit Reject Dataset (DS-05)

2.3.1 Use of the FI to FI Payment Status Report (pacs.002.001.10)

When the code "RJCT" (Rejected) is used in 'Status Reason' the message transports the B2B Direct Debit Rejection instruction between PSPs, directly or through intermediaries.

The message caters for bulk and single reject instructions.

Note: Attribute AT-R001 'Type of "R" message' in DS-05 is implied by the 'Message Name', 'pacs.002.001.10', the 'Original Message Name Identification' must begin with 'pacs.003' (the addition of a variant number and version number is optional), 'Local Instrument' under 'Payment Type Information' in 'Original Transaction Reference' set to "B2B" (SEPA Business to Business Direct Debit) and 'Status' set to "RJCT".

Note: Attribute AT-R005 'The Settlement Date for the Return instruction (DS-05) or the Reversal (DS-07)' is not applicable.

Note: Message elements under 'Original Transaction Reference' sequence are based on DS-04 attributes.

2.3.2 Message Element Specifications

The reasons for an inter-PSP **Reject** present in the Rulebook are mapped to the ISO codes as follows:

ISO Code	ISO Name	SEPA Reason as specified in the Rulebook
AC01	IncorrectAccountNumber	Account identifier incorrect (i.e. invalid IBAN)
AC04	ClosedAccountNumber	Account closed
AC06	BlockedAccount	Account blocked Account blocked for direct debit by the Debtor
AC13	InvalidDebtorAccountType	Debtor account is a consumer account
AG01	TransactionForbidden	Direct debit forbidden on this account for regulatory reasons
AG02	InvalidBankOperationCode	Operation code/transaction code/sequence type incorrect, invalid file format <i>Usage Rule:</i> To be used to indicate an incorrect 'operation code/transaction code/sequence type'
AM04	InsufficientFunds	Insufficient funds
AM05	Duplication	Duplicate collection
BE05	UnrecognisedInitiatingParty	Identifier of the Creditor Incorrect
ED05	SettlementFailed	Settlement of the Collection failed
FF01	InvalidFileFormat	Operation/transaction code incorrect, invalid file format <i>Usage Rule:</i> To be used to indicate an invalid file format.
MD01	NoMandate	No Mandate or unable to obtain mandate confirmation from the Debtor
MD02	MissingMandatoryInformationInMandate	Mandate data missing or incorrect
MD07	EndCustomerDeceased	Debtor deceased
MS02	NotSpecifiedReasonCustomerGenerated	Refusal by the Debtor
MS03	NotSpecifiedReasonAgentGenerated	Reason not specified
RC01	BankIdentifierIncorrect	PSP identifier incorrect (i.e. invalid BIC)
RR01	MissingDebtorAccountOrIdentification	Regulatory Reason

ISO Code	ISO Name	SEPA Reason as specified in the Rulebook
RR02	MissingDebtorNameOrAddress	Regulatory Reason
RR03	MissingCeditorNameOrAddress	Regulatory Reason
RR04	RegulatoryReason	Regulatory Reason
SL01	SpecificServiceOfferedByDebtorAgent	Due to specific Service offered by the Debtor PSP
DNOR	DebtorBankIsNotRegistered	Debtor PSP is not registered under this BIC in the CSM
CNOR	CreditorBankIsNotRegistered	Creditor PSP is not registered under this BIC in the CSM

2.4 Inter-PSP Reversal Instruction for a Collection (DS-07)

2.4.1 Use of the Payment Reversal (pacs.007.001.09)

The message is used to transport the Inter-PSP Reversal Instruction for a Collection sent by the Creditor PSP to the Debtor PSP, directly or through intermediaries.

The message caters for bulk and single reversal instructions.

Note: Attribute AT-R001 'Type of "R" message' in DS-07 is implied by the 'Message Name', 'pacs.007.001.09', the 'Original Message Name Identification must begin with 'pacs.003' (the addition of a variant number and version number is optional) and 'Local Instrument' under 'Payment Type Information' in 'Original Transaction Reference' set to "B2B" (SEPA Business to Business Direct Debit).

Note: Attribute AT-R002 'Identification of the type of party initiating the "R" message' is indicated by the combination of the Reversal 'Originator' with the Reversal 'Reason'.

Note: 'Original' message elements are based on DS-04 attributes.

3 LIST OF CHANGES IN THE SDD B2B INTER-PSP IMPLEMENTATION GUIDELINES - RELATIVE TO 2023 v1.1

Note: This list is for informational purposes only. The changes included in the body of the document are the ones in effect

SYMBOLS USED

1. Column one contains the identification number of the Change
2. Column two contains the reference(s) to the relevant Index Number
3. Column three contains the reference(s) to the relevant section or message element (including full path)
4. Column four contains a description of the change
5. Column five contains the type of change:
 - TYPO: Typing and layout errors
 - CLAR: Clarification of the text
 - CHAN: Change in or further alignment with the Rulebook content

N°	#	Section / Message Element	Description	Type
